A cumulative list of works represented by Library of Congress printed cards.

Happiness is one of the most written about topics in the world. It has been a core concern of humans since the beginning of time. However, "Miserably Happy" provides a unique lens in which to view this powerful emotion. While acknowledging the positive dimension of happiness (as most books do), "Miserably Happy" is also focused on the negative consequences. These negative consequences are based on the current academic and popular conceptualization of happiness being related to the experience of pleasure. In recognizing the negative dimension of happiness, "Miserably Happy" explains how the pursuit of happiness often leads to misery. Twelve-step programs are an example of how various pursuits of happiness can have tragic consequence. Alcoholism, drug abuse, over eating, and sex addiction all begin with the pursuit of pleasure and the hope of happiness. "Miserably Happy" ties our experience of genuine happiness to our fidelity to the physical-mental- spiritual properties of the human. The spiritual property of the mind presented in "Miserably Happy" is open to scientific explanation. It is a transcendent property and applies to any and all human conscious activity and defines human genuiness and authenticity. The human mind is an emergent property of our biology and therefore, aligned with our biology, defines our health and wellness. As the authors point out In living within our created nature we become deeply connected to ourselves, others, our communities, the environment and, indeed, the universe. Our journey to discover the secrets of genuine happiness ends up at its point of departure. The secret to lasting genuine happiness is found in nature. By decisively identifying the structure and norms of human body-mind-spirit, "Miserably Happy" provides an absolute basis for defining healthy human functioning and development and pinpoints the pervasive impact healthy development and functioning have on our ability to experience meaning, purpose, and genuine happiness. Take the challenge, refine your understanding and experience of happiness, become a creative and powerful force of genuine happiness and experience the exciting results your efforts will have on others.

HPV (humant papillomavirus) har lenge vært et stort tema innen kvinnehelse. Etter oppdagelsen av viruset som årsak til kreft, har vi fullstendig endret oppfatning av hva celleforandringer på kvinners livmorhals er, og ikke minst hvordan dette oppstår og utvikler seg. Dernest hvordan det kan forebygges. Viruset har fått navnet «kreftvirus» på folkemunne. En rekke feilaktige oppfatninger og påstander blir stadig framsatt. Angstnivået hos både kvinner og menn har økt i takt med fokus på problematikken, spesielt fordi vi nå vet at også menn kan utvikle kreft av dette viruset. I forbindelse med massevaksinering av unge jenter, og fra høsten 2018 også gutter, får HPV stadig mer oppmerksomhet. Foreldre er i tvil. Bør barna vaksineres? Hvor nødvendig er vaksinen? Er den tvert imot helseskadelig? Denne boka er et forsøk på å informere om hva HPV og celleforandringer er, hvilken betydning det har for oss å smittes av dette viruset. Oppfølging og behandling av celleforandringer beskrives og forklares. Effekten av HPV-vaksinering slik det har vært registrert på verdensbasis i over ti år nå, gjennomgås. Målet er å rydde opp i misforståelser og feilinformasjon, og forhåpentligvis skape en mer realistisk oppfatning av hva HPV-smitte innebærer. Boka er skrevet i et lettfattelig språk, og er beregnet for alle som ønsker mer kunnskap om emnet. Jorun Thørring er spesialist i gynekologi og obstetikk. Hun er spesielt opptatt av unges prevensjonsvalg, problemer og plager i forbindelse med kvinners overgangsalder, samt å formidle informasjon om HPV og HPV-vaksinasjon. I tillegg til å undervise leger og annet helsepersonell, har Jorun tidligere gitt ut seks skjønnlitterære bøker, en barnebok og en bok om prevensjon. Sveinung Wergeland Sørbye er spesialist i patologi og overlege ved Universitetssykehuset Nord-Norge. Han var medlem av en arbeidsgruppe nedsatt av Folkehelseinstituttet for vurdering av HPV-vaksine til gutter, og har publisert en rekke artikler om HPV, celleforandringer og kreft.
