The United States Marine Corps is the largest such force on the planet, and yet it is the smallest, most elite section of the U.S. military, one with a long and storied history. This classic 1940 official government report, created by the Corps, laid the groundwork for the "small wars" fought by the United States in the post-World War II era, and has been used to strategize the American occupation of Iraq in the early 21st century. What is a small war? What is the nature of operations for such a conflict? What kind of staffing does a small war require? What logistical and training issues need to be taken into account? What is the importance of neutral zones? How do tactics differ in a small war? How should an occupying force disarm a civilian population? and moreMilitary buffs, wargamers, and anyone seeking to understand fundamental military strategy will find this a fascinating and informative document.

There is renewed interest in the Moon in recent years, with the news that a Chinese lunar rover landed on the Moon in January 2014, and NASA announcing that it is looking for private partners to land a robot on the Moon's surface, as the first step in a programme to exploit the commercial opportunities offered by the Moon. Recent lunar expeditions by both orbiting spacecraft and 'landers' have uncovered far more detail about the Moon's surface and geology, including the trail of Neil Armstrong's first walk on the Moon in 1969. This manual explains in simple and straightforward terms, with a wealth of illustrations and photographs, what we have discovered about the Moon over the centuries, along with a general overview of the vehicles involved in the exploration.
