Every spring, he builds a number of neat, domed nests, each one made of moss, dry grass and dead leaves, sometimes with a little bracken. These are generally known as false or cock nests, for the hen will eventually select the one she likes and she takes sole responsibility for lining the nest chamber with feathers, resisting any offers of help from her mate.

How to identify bird nests - Country Life

Nesting springs means to have one or more springs fitted inside a larger spring. Nested springs enable the spring designer to get more loadbearing material into a fixed space. By so doing, the springs are able to support a greater load than one spring alone could withstand. By reducing the working stresses within each nested spring, the probable working life of the springs is increased.

What are the Benefits of Nested Springs? - EngineeringClicks

Nest is the government workplace pension scheme used by many employers. Lots of businesses opt for Nest to help their employees build a pension fund, instead of setting up their own pension schemes. It works like any other workplace pension scheme, with contributions both from you and from your employer, and tax relief on all the contributions you make.

What is a Nest pension and is it good? | unbiased.co.uk

They use straw, grasses and other natural materials to make their nests, so provide some when you can. Starlings use fresh cut green leaves from spring pruning of shrubs. They may also use moss raked from your lawn, and wool. House martins, song thrushes and blackbirds use mud in the construction of their nests.
