Your deadline just got moved up. Your artist has never worked with Flash before. Your inner programmer is telling you that no OOP is a big Oops! Any Flash developer can share similar tales of woe. This book breaks down the process of Flash game development into simple, approachable steps. Never heard of a game loop before? No idea what a design pattern is? No problem! Chris Griffith gives you real-world expertise, and real-world code that you can use in your own games. Griffith has been building games in Flash long enough to know what works and what doesn't. He shows you what you need to know to get the job done. Griffith covers Flash for the everyday developer. The average Flash developer doesn't have luxurious timelines, employers who understand the value of reusability, or the help of an information architect to design a usable experience. This book helps bridge the gap for these coders who may be used to C++, Java, or C# and want to move over to Flash. Griffith covers real-world scenarios pulled from his own experiences developing games for over 10 years in the industry. The 2nd edition will include: completely new game examples on more advanced topics like 3D; more robust physics and collision detection; and mobile device coverage with Android platform development for us on phones and tablets. Also coverage of the new features available in Flash CS5, Flash Player 10.1, and AIR 2.0 that can be used for game development. The associated web site for the book: www.flashgamebook.com gets close to 1,000 visits a month. On the site, readers can find all the source code for the examples, news on industry happenings, updates and special offers, and a discussion forum to ask questions and share ideas.

This is the most definitive, informative video reference available, made more compelling by the authors inclusion of the hottest new trends and cutting-edge development in the field. This book will serve as an invaluable guide to the designers and engineers who will design, create and deliver these products and services.

This enhanced e-book combines video and text to create a learning experience that is engaging, informative and fun. In addition to the full text of Vector Basic Training, you'll find high-quality video training that brings the topics to life through friendly visual instruction from experts and industry professionals. Listen up, designers, and wipe those grins off your faces! It's time to get serious about your design work. For too long you've allowed yourself to slack off, relying on your software to do all of your creative work for you. This book will NOT show you how to use every tool and feature in Adobe Illustrator. This book WILL, however, teach you the importance of drawing out your ideas, analyzing the shapes, and then methodically building them precisely in vector form using the techniques explained in this book. In Vector Basic Training, acclaimed illustrative designer Von Glitschka takes you through his systematic process for creating the kind of precise vector graphics that separate the pros from the mere toolers. Along the way, he'll whip your drawing skills into shape and show you how to create elegant curves and precise anchor points for your designs. The book and accompanying video tutorials will get you ready for active creative duty in zero hundred hours or less. In Vector Basic Training, you'll learn: ¿The tools, plugins, and shortcuts that make up a design pro's creative armament How to use "The Clockwork Method" to create accurate curves every time When and where to set just the right number of anchor points for any design How to build shapes quickly using familiar Illustrator tools Techniques for art directing yourself so that your work gets the response you desire Why symmetry is your friend and how to use it effectively in your designs Von Glitschka reports for duty in over 4 hours' worth of video tutorials that walk you through all the techniques explained in the book. Art files you can use to follow along with the book's samples are downloadable separately (see last page of your eBook for download instructions).
