Edited by a recognised team of experts from the USA and Italy, *New Frontiers in Plastic and Cosmetic Surgery* is an innovative, authoritative, and richly illustrated guide to the most recent procedures in plastic and cosmetic surgery, and their potential for future use. The book is divided into six clear sections, covering stem cells, liposuction, head and neck, breast, body and extremities. The first section on stem cells covers current and future applications of tissue engineering in plastic and reconstructive surgery, including the growth of tissues and organs. The extensive section on liposuction outlines the effectiveness of current techniques in reducing limb volume, with good cosmetic and functional outcomes and a low rate of complications. Several cosmetic breast surgery techniques are covered, including a new

This book is designed to offer practitioners clear, up-to-date guidance on the management of complications associated with maxillofacial cosmetic surgery. The first section provides a detailed overview of general topics relating to cosmetic surgery patients, including assessment, anesthesia and medical complications, wound healing, postoperative infection, pain management, and medicolegal issues. The second section then discusses the nature and management of the complications associated with each maxillofacial cosmetic surgery procedure, from laser treatment and use of neuromodulators and soft tissue fillers to orthognathic surgery, rhinoplasty, neck procedures, rhytidectomy, genioplasty, and facial implants. Complications in Maxillofacial Cosmetic Surgery is multi-authored, multi-

Cheney ' s earlier work that was widely hailed as the first comprehensive resource for facial plastic surgeons. In this new version, Dr. Cheney has teamed up with Dr. Tessa Hadlock as a co-editor. Together they have expanded the scope of the book and the number of contributors to include a global network of world-renowned experts from facial plastic surgery, otolaryngology, and dermatology. Providing the foundation for the chapters that follow, the first part of the book supplies beautiful anatomic descriptions and important information on facial aging, flap reconstruction, and applied skin physiology. The next chapters include detailed step-by-step illustrations documenting the latest techniques for aesthetic and reconstructive procedures of the eyelids, nose, ears, face, and head and neck. Another
