15 Years is an Average HVAC Expected Life. According to ASHRAE, most heating and cooling equipment can be expected to last 15 years with moderate or typical maintenance. In this scenario, the building owner, superintendent or property manager does their best to ensure the unit is cleaned yearly, and the air filters are changed on time.

The purpose of the ASHRAE database is to provide current information on service life and maintenance costs of typical HVAC equipment. Engineers depend on accurate owning and operating data to make decisions involving the life cycle and functionality of buildings. But a lack of sufficient, up-to-date data makes it difficult to provide a solid basis for those decisions. [Click here for the most ...](#)

The American Society of Heating, Refrigerating and Air-Conditioning Engineers (ASHRAE) publishes what is called the ASHRAE Equipment Life Expectancy chart with detailed information on how long a component is likely to function. While in many cases a piece of equipment will exceed the “median years” number if well maintained, Timberline recommends becoming familiar with the chart and being prepared to take action as a piece of equipment’s predicted useful life is nearing an end.
