'Energy Cut' is a definitive 20 step guide that gives small businesses practical advice on how to cut their energy use and save money.

Some social issues and practices have become dangerous areas for academics to research and write about. 'Academic freedom' is increasingly constrained, not just by long established 'normal' factors (territoriality, power differentials, competition, protectionism), but also by the increased significance of social media and the rise of identity politics (and activists who treat work which challenges their

world view as abusive hate-speech). So extreme are these pressures that some institutions and even statutory bodies now adopt policies and practices which contravene relevant regulations and laws. This book seeks to draw attention to the limiting and damaging effects of academic ‘gagging’. The book, drawn from a special edition of *Societies*, offers an eclectic series of international articles which may annoy some people. The book challenges taken for granted mainstream assumptions and practices in a number of areas, including gender mainstreaming, social work education, child sexual abuse, the ethnic disaggregation of population groups, fatherhood and masculinity, the erosion of democratic legitimacy, the trap of victimhood and vulnerability, employment practices in universities, and the challenges presented by the widespread and deliberate suppression of scholarship and research. In an analytic postscript Laurent Dubreuil discusses the nature of identity politics and the manner in which its effects can be identified across the many topics covered in these challenging articles.

In the last decades, Ingvar Johansson has made a formidable contribution to the development of philosophy in general and perhaps especially to the development of metaphysics. This volume consists of original papers written by 50 philosophers from all over the world in honour of Ingvar Johansson to celebrate his 70th birthday. The papers cover traditional issues in metaphysics and the philosophy of mind, applied ethics and applied metaphysics, the nature of human rights, the philosophy of economics and sports. Some of the papers study the philosophy of Ingvar Johansson. All of them studies subjects which he has shown an interest in. The variety of subjects covered, testifies to the extraordinary wide range of issues his thought has had a bearing on.

We often think of the army as an institution whose members are required to blindly obey all orders they receive. However, this perception is inaccurate. Disobedience is a fundamental professional obligation of members of the military and overrides the obligation to follow commands. But what is the extent of this obligation? Are soldiers obligated to participate in what they consider to be an illegal war, or should they be allowed to enjoy a right to selective conscientious objection? Should soldiers obey a legal order that, if followed, would facilitate the perpetration of war crimes by a third party? How should soldiers act if they are ordered to follow a lawful order that could result in immoral consequences? Should soldiers be allowed to refuse to obey what can be labeled as suicidal orders? Based upon the nature of soldiers' professional obligations, this book tries to offer answers to these important questions. The author turns to a number of different case-studies, including conscientious objections, duty to protect in genocidal situations such as Rwanda and Srebrenica, suicidal orders in wars, as well as retribution and leniency towards war criminals, as a way of assessing the different legal and ethical implications of disobedience in the military.

This project draws together the diverse strands of the debate regarding disability in a way never before combined in a single volume. After providing a representative sampling of competing philosophical approaches to the conceptualization of disability as such, the volume goes on to address such themes as the complex interplay between disability and quality of life, questions of social justice as it relates to

disability, and the personal dimensions of the disability experience. By explicitly locating the discussion of various applied ethical questions within the broader theoretical context of how disability is best conceptualized, the volume seeks to bridge the gap between abstract philosophical musings about the nature of disease, illness and disability found in much of the philosophy of medicine literature, on the one hand, and the comparatively concrete but less philosophical discourse frequently encountered in much of the disability studies literature. It also critically examines various claims advanced by disability advocates, as well as those of their critics. In bringing together leading scholars in the fields of moral theory, bioethics, and disability studies, this volume makes a unique contribution to the scholarly literature, while also offering a valuable resource to instructors and students interested in a text that critically examines and assesses various approaches to some of the most vexing problems in contemporary social and political philosophy.
