Importing or drawing any type of project (2D and 3D), from the easiest to the most complex, thanks to a unique design system. Thanks to the integration of a new learning system, the software enables users to access sophisticated functionalities. The user only needs to set the dimensions and then - with a simple click - can visualise the product to be processed on a screen, together with all the operations needed to manufacture it.

~~Biesse Use Of Software Manual — engineeringstudymaterial.net~~

The original design of this post did use the ROUT Macro, but when working with Biesse in testing the post they highly recommended that we use the GEO/ROUTG Macros since this is how they like to run the machine. I believe there are some idiosyncrasies with the ROUT Macro, such as not moving at a rapid rate between profiles (per Biesse).

CAD Software: CAD stands for Computer Aided Design. Basically, it is drawing on the computer, but with measurements applied to the drawings. Use it to create and revise your designs. CAD Software is how “blueprints” for parts are created in the CNC world. CAM Software: CAM stands for Computer Aided Manufacturing.
