The accurate determination of operating costs and the knowledge of significant influential factors on these costs are crucial foundations for a holistic assessment of planning alternatives during the life cycle of real estate. The quantitative approach of the research study is based on empirical data of operated buildings in Germany. The study is dedicated to the development, validation, and evaluation of statistical models for an investigation of causal interrelationships between operating costs and a variety of potential influential factors on these costs. The main objective is the provision of essential information, models, and adequate cost indicators for an accurate determination of operating costs for an application in the field of cost planning of real estate. The practical application of the results is demonstrated in detailed implementation examples. The results of the study are directed towards architects, planners, and the real estate management and can serve as the basis for decision making and budgeting.

An inspirational set of booklets that invite us to delve into the intellectual world of Peter Zumthor and his guests. In summer 2017, celebrated Swiss architect Peter Zumthor curated the exhibition Dear to Me at the Kunsthaus Bregenz, marking the twentieth anniversary of one of his most famous designs. Part of the program were conversations with philosophers, curators, historians, composers, writers, photographers, collectors, and craftsmen that Zumthor had invited to contribute to the exhibition. His dialogues with them offer insights into the thoughts and practice of fascinating personalities. Together with his counterparts, he explores artistic preferences and practices, reasonings, as well as practical knowledge from artisanal experience. Always charming and affectionate, he follows up persistently, and with gentle determination takes his guests on mutual intellectual strolls. In Dear to Me, Zumthor's equally serious and serene conversations with Anita Albus, Aleida Assmann, Marcel Beyer, Héléne Binet, Hannes Böhringer, Renate Breuss, Claudia Comte, Bice Curiger, Esther Kinsky, Ralf Konersmann, Walter Lietha, Olga Neuwirth, Rebecca Saunders, Karl Schlögel, Martin Seel, Ruedi Walli, and Wim Wenders are collected in seventeen booklets held together in an exquisitely manufactured box. An eighteenth complementary booklet documents the Dear to Me exhibition in Bregenz through concise texts and images.

School refusal affects up to 5% of children and is a complex and stressful issue for the child, their family and school. The more time a child is away from school, the more difficult it is for the child to resume normal school life. If school refusal becomes an ongoing issue it can negatively impact the child ' s social and educational development. Psychologist Joanne Garfi spends most of her working life assisting parents, teachers, school counsellors, caseworkers, and community policing officers on how best to deal with school refusal. Now her experiences and expertise are available in this easy-to-read practical book. Overcoming School Refusal helps readers understand this complex issue by explaining exactly what school refusal is and provides them with a range of strategies they can use to assist children in returning to school. Areas covered include: • types of school refusers • why children refuse to go to school • symptoms • short term and long term consequences • accurate assessment • treatment options • what parents can do • what schools can do • dealing with anxious high achievers • how to help children on the autism spectrum with school refusal

This study explores the Europe 2020 strategy and the role of European political entrepreneurship in debating, shaping and implementing this strategy within the EU. The book sets out to explore the content, conditions and consequences of Europe 2020 by analysing the plan for a future prosperous EU economy. The main focus is on European political entrepreneurship and how the strategy has been debated and decided on, and then implemented from a governance perspective with multiple European actors.

The inventor of the vertical garden showcases some of his favorite projects, which he has created all over the world for museums, hotels, skyscrapers, private homes and more.

Innovation in architecture: a step ahead with movement.

Partnering is a set of strategic actions that deliver vast improvements in construction performance. It is driven by a clear understanding of mutual objectives and cooperative decision making by a number of firms, who are all focused on using feedback to continuously improve their joint performance. A 'second generation' of Partnering has now emerged that requires a strategic decision to cooperate in improving joint performance by a client and a group of consultants, contractors and specialists engaged in an ongoing series of projects. Second Generation Partnering is underpinned by 'Seven Pillars'. Each pillar represents a set of management actions that provide an essential element of Second Generation Partnering. The research also identifies the beginnings of a third generation of Partnering in which the construction industry becomes a truly modern industry producing and marketing a range of products and services that clients are eager to invest in. The dramatic improvements in performance delivered by Second and Third Generation Partnering enable construction firms to meet the demands of their customers - whether they need greater certainty, better designs, faster delivery, lower costs, zero defects, guarantees or sophisticated after-care services.

The Gospel Truth, by Luke Fraser, gives readers and unparalleled view of the Martial Arts, Personal Protection & Police Defense Tactics world as it exists today. A Master Instructor with over 25 years experience, Luke Fraser can help anyone to wipe away much of the confusion behind the martial arts and the techniques being taught in most schools.Throughout the pages of this book the reader will uncover the truth about violent attacks and why most martial arts academies in the United States are instructing improperly. You will be shown statistical facts about all 7 of the basic types of violent attacks. The author skillfully dissects the 10 essential elements needed for combat readiness in a masterful way. Over 200 professional photographs depict the most realistic and useful ways to apply your own self-defense techniques in a street effective fashion. You will study the effects of adrenaline on the body and how it can either prohibit or promote a successful defense in the most extreme circumstances.
