"The book 'Seeing an invisible world' offers an exciting synopsis of the international development of thermal imagers from the historical beginnings until the introduction of the staring thermal imagers and their exemplary application in the medical and the military field. The work presents numerous instructive photographs, figures and technical diagrams and is a must for all technically interested readers and members of the optical community. Moreover, it is intended to share a touch of the fascination arising from the

capability to 'see an invisible world' in the darkest night without any illumination"--Publisher.

Be it eyeglasses or telescopes, camera or movie lenses, microscopes or microsurgical instruments, the ZEISS brand stands for technology that pushes the limits of what is possible. Relatively little is known about the company ' s founder Carl Zeiss (1816 – 1888). Who was the man who set about revolutionizing optical device construction from his workshop in the small town of Jena ? Was the company established on solid entrepreneurial foundations, or was Carl Zeiss surprised, and ultimately overwhelmed, by his own success? The historian Stephan Paetrow and the Head of the ZEISS Archives, Wolfgang Wimmer, have embarked on a journey to discover the life and work of a man who was a husband, a technician and an entrepreneur: this is the story of Carl Zeiss. This biography also takes a look at how topical the Zeiss legacy is by talking to a family member, company representatives and an extraordinary scientist of the modern era.

This manual, "Rifle Marksmanship M16-/M4-Series Weapons," provides guidance for planning and executing training on the 5.56-millimeter M16-series rifle (M16A1/A2/A3/A4) and M4 carbine. It is a guide for commanders, leaders, and instructors to develop training programs, plans, and lessons that meet the objectives or intent of the United States Army rifle marksmanship program and FM 7-0. This manual is organized to lead the trainer through the material needed to conduct training during initial entry training (IET) and unit sustainment training. Preliminary subjects include discussion on the weapon's capabilities, mechanical training, and the fundamentals and principles of rifle marksmanship. Live-fire applications are scheduled after the Soldier has demonstrated preliminary skills.
