At Dwell, we're staging a minor revolution. We think that it's possible to live in a house or apartment by a bold modern architect, to own furniture and products that are exceptionally well designed, and still be a regular human being. We think that good design is an integral part of real life. And that real life has been conspicuous by its absence in most design and architecture magazines.

Industry and commerce use vast amounts of water and in some parts of the world water is becoming a scarce commodity. We need to take more care in our future use of water, and this book is a 'best practice' manual for industrial and commercial users world-wide. It offers a practical account of the measures which can be taken to re-educate industrial and commercial users in the techniques of water saving and re-use anywhere in the world. The principles are covered in detail and supported by examples from specific industries and commercial operations. Author Mohan Seneviratne is Manager of Sydney Water's 'Every Drop Counts Business Program', which won the prestigious 2006 Stockholm Industry Water Award in recognition of how the utility is working in partnership with business, industry and government to help ensure the long-term sustainability of Sydney 's water supply. * The first book to cover water conservation for industrial users from processing plants to pubs and clubs * Provides practical advice on implementing water conservation for users in various industry sectors * Written by a practicing water conservation consultant

As Australian cities face uncertain water futures, what insights can the history of Aboriginal and settler relationships with water yield? Residents have come to expect reliable, safe, and cheap water, but natural limits and the costs of maintaining and expanding water networks are at odds with forms and cultures of urban water use. Cities in a Sunburnt Country is the first comparative study of the provision, use, and social impact of water and water infrastructure in Australia's five largest cities. Drawing on environmental, urban, and economic history, this co-authored book challenges widely held assumptions, both in Australia and around the world, about water management, consumption, and sustainability. From the 'living water' of Aboriginal cultures to the rise of networked water infrastructure, the book invites us to take a long view of how water has shaped our cities, and how urban water systems and cultures might weather a warming world.

Keep your lawn and garden lush without wasting resources by capturing and recycling the greywater that drains from your sink, shower, and washing machine. This accessible and detailed guide walks you through each step of planning for and installing a variety of greywater systems, including laundry-to-landscape and branched drain gravity-fed systems. After identifying greywater sources in your home and estimating flow rate, you ' ll learn to pinpoint where to redirect the wastewater for the greatest benefit. No matter which system you decide to build, you'll have the information to construct it yourself or move forward with confidence to hire a professional.

Combining humor and memorable anecdotes, five famous ecotourist destinations offer a breathtaking backdrop to better understanding climate change. Crossing the far corners of the globe, *Tales of an Ecotourist* showcases travel, from the hot and humid Amazon jungle to the frozen but dry Antarctic, as a simple yet spellbinding lens to better understand the complex issue of climate change. At its core, climate change is an issue few truly understand, in large part due to its dizzying array of scientific, economic, cultural, social, and political variables. Using both keen humor and memorable anecdotes, while weaving respected scientific studies along the way, Mike Gunter Jr. transports the reader to five famous ecodestinations, from the Galapagos Islands to the Great Barrier Reef, revealing firsthand the increasing threats of climate change. Part travelogue, part current events expos é , with a healthy dose of history, ecology, and politics, these tales of ecoadventure tackle such obstacles head on while fleshing out much-needed personal context to perhaps society ' s greatest threat of all. “ Gunter takes us to the far corners of the globe to understand the lived experience of climate change. More than a travelogue, *Tales of an Ecotourist* explains how getting outside—out of our houses, immediate surroundings, and comfort zones—can awaken all of us to the realities and urgency of a warming world. This is a rich, beautifully written, and compelling book. ” — Paul Wapner, author of *Living Through the End of Nature: The Future of American Environmentalism* “ In *Tales of an Ecotourist* Mike Gunter Jr. takes you on a remarkable journey, both figuratively and literally, as he recounts his experiences visiting some of the most amazing places on our planet. As a genuine, true-to-principles ecotourist, he has an important lesson for us: If we are to veer from our current path of global environmental degradation, we will have to come to appreciate firsthand its remarkable wonder and beauty. ” — Michael E. Mann, coauthor of *The Madhouse Effect: How Climate Change Denial Is Threatening Our Planet, Destroying Our Politics, and Driving Us Crazy*
