Change Request Management (CHARM) with SAP Solution Manager. In a SAP environment in particular, it is often essential to be able to execute changes (both big and small) and entire projects in parallel. SAP Solution Manager gives you an ITIL-compliant Change Request Management (ChARM) system that assists you in the execution and monitoring of activities for all of the changes to your IT systems.

~~Change Request Management (CHARM) with SAP Solution Manager~~

For Change Request Management, you need to

documentation behind approvals.

~~SAP ChaRM (Change Request Managemet) :~~

~~Strengths and Weaknesses~~

Change Request Management enables you to control changes within a system landscape from a central SAP Solution Manager system. It integrates SAP CRM business transaction functionality for managing requests for change, and in a process-oriented fashion extends and documents project control by integrating project planning from the processing of requests for change to the actual transport into productive systems.
