Ministries of foreign affairs are prominent institutions of state diplomacy. They remain the operators of key practices associated with diplomacy: communication, representation and negotiation. This book fills a gap by approaching ministries of foreign affairs in a comparative and comprehensive way.

Gold medal winner in the 2008 Axiom Business Book Awards, *The Culture of Collaboration* describes how collaborative culture is changing business models and the nature of work. Collaboration and communication strategist Evan Rosen provides a timely and revealing look inside the world's most collaborative organizations including Toyota, Boeing, Procter & Gamble, DreamWorks Animation, The Dow Chemical Company, Industrial Light and Magic, the Mayo Clinic and others. He explains how their methods can create value in almost every industry. Rosen also describes the trend towards real-time, spontaneous collaboration and the deserialization of interaction and work. From the book's back cover: "Prepare to be stunned by dramatic results never before seen in fields ranging from aerospace to medical research. Evan Rosen's *The Culture of*

focus on managerial competencies, this text continues to be the market leader in the field. In the Seventh Edition, author Geraldine E. Hynes and new co-author Jennifer R. Veltsos preserve the book's strategic perspective and include new updates to reflect the modern workplace. The new edition adds a chapter on visual communication that explains how to design documents, memorable presentations, and impactful graphics. New coverage of virtual teams, virtual presentations, and online communication help students avoid common pitfalls when using technology.

a reference book for researchers and practitioners in the disciplines of computer science, electronics and telecommunication, information science, and electrical engineering. Machine learning and Big data analytics represent a key ingredients in the industrial applications for new products and services. Big data analytics applies machine learning for predictions by examining large and varied data sets—i.e., big data—to uncover hidden patterns, unknown correlations, market trends, customer preferences, and other useful information that can help organizations make more informed business decisions.
