For 1" to 1-1/2" housing, place the cartridge in the FCV housing and then place the housing on a solid surface. Use hammer to tap down the cartridge into the housing seat (approximately 3/4" travel).

2. Reinstall, or replace the clip ring in the housing grooves and reassemble the end pieces and O-rings.

The control valve should always be installed on a horizontal steam line, never vertically. A control

valve in a vertical installation has no ability to eliminate the buildup of condensate prior to the inlet of the control valve. Condensate passing through the steam control valves always has negative effect on the valve life. 10.
