As the world becomes increasingly more interconnected and globalized, increasingly more families are seeking early (0-6 years) foreign and second language education, prompting educators and teachers to seek out age-appropriate tools which offer an innovative approach to early language learning (ELL). questions: How can we introduce children to foreign languages at an early age in a natural and also naturally playful way? And with which approach? This book presents a documented reflection that is rooted in concrete experiences which the authors have accumulated over the past twenty years of field-work, providing readers with many innovative yet practical and operational examples of how puppets have been used to facilitate ELL. Puppets, easily integrated into children's natural play environment, represent a pedagogical tool par excellence for the teaching-learning of foreign languages. Using puppets, educators can create stimulating and enriching learning contexts, engaging children and moving them towards educational learning objectives, very naturally and through active and interactive play. Moreover, puppets, being puppets, can speak various languages, experience various life-events, and share these with young learners, be they homogeneous, heterogeneous, international, transcultural and/or intercultural groups. Indeed, "the language of puppets" is naturally multilingual and intercultural.

The Anarchist Cookbook will shock, it will disturb, it will provoke. It places in historical perspective an era when "Turn on, Burn down, Blow up" are revolutionary slogans of the day. Says the author "This book... is not written for the members of fringe political groups, such as the Weatherman, or The Minutemen. Those radical groups don't need this book. They already know everything that's in here. If the real people of America, the silent majority, are going to survive, they must educate themselves. That is the purpose of this book." In what the author considers a survival guide, there is explicit information on the uses and effects of drugs, ranging from pot to heroin to peanuts. There i detailed advice concerning electronics, sabotage, and surveillance, with data on everything from bugs to scramblers. There is a comprehensive chapter on natural, non-lethal, and lethal weapons, running the gamut from cattle prods to sub-machine guns to bows and arrows.

The cheerful celebration of art, music, and cheese from beloved four-time Caldecott Honor-winner Leo Lionni. While nibbling at a huge hunk of parmesan cheese, Geraldine uncovers a cheese statue of a mouse playing what seems to be a flute but on closer inspection is really its tail. That night Geraldine is woken by silver and gold sounds. "This must be music!" she says. And every night the cheese mouse fills Geraldine's hideaway with beautiful music. Then one day her hungry mice friends ask her to share her cheese with them. Geraldine's new love of music infuses her with a magic of her own and provides a satisfying conclusion to this delightful tale.
