This new edition has been comprehensively updated to include new information on the latest clinical evidence, national guidelines, and from the recent medical literature; * all existing cases have been revised * many new cases have been added, including telephone consultation, home visit, dealing with a patient with a hearing impairment, and a consultation with more than one person * the key national guidelines have been summarised within the appropriate case. The first two editions have helped thousands of candidates through the CSA exam in the last 6 years. The original approach has therefore been retained so the book continues to offer readers a concise 'need-to-know' guide to passing the CSA, with the emphasis on successfully completing a case in the allotted ten minutes using a structured consultation framework that works. The aim of the book is to leave exam candidates with more time to concentrate on passing the CSA exam itself.

From reviews: "...this is an excellent book which I would unreservedly recommend to all CSA candidates. Its razor-sharp focus, user-friendly layout, emphasis on the RCGP curriculum and marking criteria make it a priceless resource for CSA candidates." Dr Hamed Khan, GP Magazine, May 2011. CSA Revision Notes for the MRCGP is divided into medical subject areas and each section works through the personal, data gathering, diagnostic and clinical management skills required to pass the CSA exam. Each section finishes with role play scenarios so you can test your abilities with a colleague. The book is an essential revision source for anyone preparing for the CSA exam.

CSA Cases Workbook 2 is a unique workbook designed to be used by GP revision groups practising for the CSA examination – it is written by three GPs who recently passed the CSA. Building on the success of the first edition, this new edition includes over 20 new cases aligned to the RCGP curriculum areas and latest guidelines. The ringbound design makes the practice consultations as exam-like as possible – allowing each member of the revision group to act as 'doctor', 'patient' or 'observer' and to take out just the pages they need ahead of the next revision session. Along with easy to use marking schemes for every case, the cases also now include smartphone links to guide readers to useful resources. To help further with revision, each curriculum area is split up into: • possible cases – lists the cases most likely to come up in the CSA (including emergency and 'special' cases) • revision notes – fully updated to provide the latest NICE and SIGN guidelines, along with other helpful references and websites, to help direct your revision • material for the patient – a list of resources that you could usefully guide the patient towards in the consultation (including after you have passed the CSA) • practice explanations – topics, tests and procedures that you should be able to describe to the patient in a couple of minutes • practice examinations – procedures you should be able to undertake confidently Furthermore, the authors suggest a combination of 13 cases which could be used to run your own mock exam in preparation for the real thing. Your revision group needs just a single copy of CSA Cases Workbook rather than multiple copies of any other book, and no photocopying needed either! - WINNER OF THE BMA YOUNG AUTHORS AWARD -
