DNA Replication Animation - Super EASY Dna Replication Paperclip Activity Answers

DNA replication occurs with the involvement of many enzymes. The DNA molecule is unzipped and therefore separated into two single strands that we will call the "parent strands". These are then used as templates for the complementary base pairing that will take place.

DNA Replication (Paper Clip Activity) | jendan13
DNA Replication Paper Clip Activity. Paperclip DNA Replication. DNA Replication Overview: • To “ replicate ” DNA means to produce an exact copy of itself. • DNA is able

Online Library Dna Replication Paperclip Activity Answers

to make an exact replica of itself because of the base pairing characteristics (A with T and C with G). • When DNA makes a duplicate molecule of itself, the two strands unwind. •

After the two strands have pulled apart, new bases (A, T, C, & G) as well as new sugar and phosphate units come into place according to ...
