Präparieren? Sobotta Präparieratlas! - Angepasst an die 24. Auflage Die Anatomie steht an, der Anatomie-Atlas und das Präparier-Besteck sind gekauft, das universitätseigene Präparierskript ist zur Hand - und ab gehts in den Präpariersaal. Aber halt - meinen teuren Atlas möchte ich nicht mitnehmen in den Präpariersaal, nur woher bekomme ich gute Abbildungen, die mir erklären, was ich am Körperspender wo genau sehe? Hier hilft der Sobotta Präparieratlas weiter! In diesem handlichen Atlas sind alle für das Präparieren wichtigen Sobotta-Abbildungen zusammengestellt, überaus realitätsnah, besonders detailliert wo nötig und zu speziellen Themen um echte Leichenfotos ergänzt. Das Präparierskript der Uni liefert die Anleitungen, der Sobotta Präparieratlas die Abbildungen dazu. Damit der gute Atlas zu Hause bleiben kann! Bilinguale Ausgabe Deutsch-Englisch mit lateinischer Nomenklatur The dissection course is due? Then the new Dissection Atlas is a must-have! This convenient hands-on atlas compiles all essential anatomic images necessary for successful dissection. Spiral binding and firm, wipeable pages make the Dissection Atlas the ideal companion for the dissection lab – combinable with all other atlases or lecture notes. Particularly detailed and realistic images make it easy to clearly recognise anatomic structures and, therefore, to master the real situation in the dissection lab. Ideally equipped for dissection class: Step by step:All body areas are bundled by chapter following the order in your course Layer by layer:Successive images allow effortless understanding of every single step in the dissection process For those who already study with the Sobotta Atlas: The chapter division is consistent with that of our three-volume Sobotta Atlas of Human Anatomy which facilitates consulting your books for reinforced learning. In addition, the original image numbers from the Sobotta Atlas are provided with each image – retrieval guaranteed! Bilingual Edition German - English with Latin Nomenclature

The Dissection of Vertebrates covers several vertebrates commonly used in providing a transitional sequence in morphology. With illustrations on seven vertebrates – lamprey, shark, perch, mudpuppy, frog, cat, pigeon – this is the first book of its kind to include high-quality, digitally rendered illustrations. This book received the Award of Excellence in an Illustrated Medical Book from the Association of Medical Illustrators. It is organized by individual organism to facilitate classroom presentation. This illustrated, full-color primary dissection manual is ideal for use by students or practitioners working with vertebrate anatomy. This book is also recommended for researchers in vertebrate and functional morphology and comparative anatomy. The result of this exceptional work offers the most comprehensive treatment than has ever before been available. * Received the Award of Excellence in an Illustrated Medical Book from the Association of Medical Illustrators * Expertly rendered award-winning illustrations accompany the detailed, clear dissection direction * Organized by individual organism to facilitate classroom presentation * Offers coverage of a wide range of vertebrates * Full-color, strong pedagogical aids in a convenient lay-flat presentation

A guide for dissecting animals, beginning with the earthworm and progressing to more complex anatomies such as grasshopper, starfish, perch, and ultimately a fetal pig. Includes a chapter on dissecting flowers.

Detailed and concise dissection directions, updated valuable information and extraordinary illustrations make The Dissection of Vertebrates, 3rd Edition the new ideal manual for students in comparative vertebrate anatomy, as well as a superb reference for vertebrate and functional morphology, vertebrate paleontology, and advanced level vertebrate courses, such as in mammalogy, ornithology, ichthyology, and herpetology. This newly revised edition of the most comprehensive manual available continues to offer today's more visually oriented student with a manual combining pedagogically effective text with high-quality, accurate and attractive visual references. This new edition features updated and expanded phylogenetic coverage, revisions to the illustrations and text of the lamprey, shark, perch, mudpuppy, frog, cat, pigeon, and reptile skull chapters, and new sections on amphioxus or lancelet (Branchiostoma, Cephalochordata), a sea squirt (Ciona, Urochordata), shark musculature, a gravid shark, shark embryo, cat musculature, and the sheep heart. Using the same systematic approach within a systemic framework as the first two editions, The Dissection of Vertebrates, 3rd Edition covers several animals commonly used in providing an anatomical transition sequence. Nine animals are covered: amphioxus, sea squirt, lamprey, shark, perch, mudpuppy, frog, cat, and pigeon, plus five reptile skulls, two mammal skulls, and the sheep heart. Winner of a 2020 Textbook Excellence Award (College) (Texty) from the Textbook and Academic Authors Association Seven detailed vertebrate dissections, providing a systemic approach Includes carefully developed directions for dissection Original, high-quality award-winning illustrations Clear and sharp photographs Expanded and updated features on phylogenetic coverage New sections on: amphioxus (Cephalochordata); sea squirt (Urochordata); shark musculature; gravid shark; shark embryo; cat musculature; sheep heart

An under-the-sea retelling of The Three Little Pigs in a chunky, hands-on board book! ""Little fish, little fish, let me come in."" "Not by the skin of my finny fin fin!" "Then I'll munch, and I'll crunch, and I'll smash your house in!" Mama tells her three little fish that it's time to make their own homes. Jim builds his house of seaweed, but the big bad shark munches it up. Tim builds his house of sand, but the shark crunches it up. It's smart Kim who sets up house in an old sunken ship! Children will delight in this silly whale of a tale with funny, eye-popping illustrations in a sturdy, shiny new board book edition! Safe for all ages.

The Darwin Elasmobranch Biodiversity Conservation and Management project in Sabah held a three-day international seminar that included a one-day workshop in order to highlight freshwater and coastal elasmobranch conservation issues in the region and worldwide, to disseminate the result of the project to other Malaysian states and countries, and to raise awareness of the importance of considering aspects of elasmobranch biodiversity in the context of nature conservation, commercial fisheries management, and for subsistence fishing communities. These proceedings contain numerous peer-reviewed papers originally presented at the seminar, which cover a wide range of topics, with particular reference to species from freshwater and estuarine habitats. The workshop served to develop recommendations concerning the future prospects of elasmobranch fisheries, biodiversity, conservation and management. This paper records those conclusions, which highlight the importance of elasmobranchs as top marine predators and keystone species, noting that permanent damage to shark and ray populations are likely to have serious and unexpected negative consequences for commercial and subsistence yields of other important fish stocks.
