overview of clinical diagnosis and laboratory approaches; Overview of treatment approaches for fungal infections; Clinical perspectives in the diagnosis and management of histoplasmosis; Presentation and management of coccidioidomycosis in immune competent and immunosuppressed patients; Clinical manifestations and treatment of blastomycosis; Update on the epidemiology, diagnosis, and treatment of cryptococcal infections; Approach to fungal infections in HIV-infected individuals: Pneumocystis and beyond; Fungal infections in immunocompromised patients with malignancies: practical approaches to prevention, diagnosis, and treatment; Candidemia in the intensive care unit; Fungal infections following lung transplantation; Noninvasive aspergillus infections and syndromes; Contemporary laboratory modalities for the diagnosis of fungal infections; Emergence of the molds other than Aspergillus in immunocompromised patients.

This edited volume presents selected contributions from the International Conference on Experimental Vibration Analysis of Civil Engineering Structures held in San Diego, California in 2017 (EVACES2017). The event brought together engineers, scientists, researchers, and practitioners, providing a forum for discussing and disseminating the latest developments and achievements in all major aspects of dynamic testing for civil engineering structures, including instrumentation, sources of excitation, data analysis, system identification, monitoring and condition assessment, in-situ and laboratory experiments, codes and standards, and vibration mitigation.

The Psychology of Globalization: Identity, Ideology, and

File Type PDF Empirical Ysis Of Risk Culture In Financial Insutions

Action underpins the necessity to focus on the psychological dimensions of globalization. Overviewing the theory and empirical research as it relates to globalization and psychology, the book focuses on two key domains: social identity and collective action, and political ideology and attitudes. These provide frameworks for addressing four specific topics: (a) environmental challenges, (b) consumer culture, (c) international security, and (d) transnational migration and intra-national cultural diversification. Arguing that individual social representation and behavior are altered by globalizing processes while they simultaneously contribute to these processes, the authors explore economic, political and cultural dimensions. Discusses how globalization affects our social identity and relations to people from other cultures Examines how individuals and groups influence processes of globalization through consumer choice Investigates how people deal with global challenges, such as climate change, mass migration and security issues Discusses terrorism in globalized culture Covers the environmental crises and our responses to them

This book proposes a theoretical framework identifying external and internal factors that influence internationalization strategy of Chinese brands and brand performance. It explores several key strategies e.g. standardization versus adaptation, price leadership versus branding, OBM export versus OEM export, and incremental versus leap-forward internationalization model. The relationships are examined between various international marketing mix e.g. distribution channel and pricing strategies, and brand performance. Through case studies the text also analyses the internationalization of contract-based firms.

Mathematics, this book introduces and explores the contemporary issues and key ideas entailed in the teaching and learning of this subject. This book is concerned with exploring the bigger picture of mathematics education, and is aimed particularly at those learning to teach mathematics; teachers in the classroom who want to continue thinking and developing as mathematics teachers; and those concerned with education who would like to be better informed about mathematics education. Divided into seven sections to help structure reading, this book offers a completely up-to-date, comprehensive overview, written by the most-known, well-respected experts in the field.

The capability approach has developed significantly since Amartya Sen was awarded the Nobel Prize in Economics in 1998. It is now recognised as being highly beneficial in the analysis of poverty and inequality, but also in the redefinition of policies aimed at improving the well-being of individuals. The approach has been applied within numerous sectors, from health and education to sustainable development, but beyond the obvious interest that it represents for the classical economics tradition, it has also encountered certain limitations. While acknowledging the undeniable progress that the approach has made in renewing the thinking on the development and well-being of a population, this book takes a critical stance. It focuses particularly on the approach's inadequacy vis-à-vis the continental phenomenological tradition and draws conclusions about the economic analysis of development. In a more specific sense, it highlights the fact that the approach is too bound by standard economic logic, which has prevented it from taking account of a key 'person' dimension — namely, the ability of an individual to assume responsibility. As a result, this book advocates the notion that if the approach is used carelessly in relation to development

policies, it can cause a number of pernicious effects, some of which may lead to disastrous consequences. Due to its multidisciplinary nature, this book will be of interest to those working in the fields of economics, philosophy, development studies and sociology.

Can we know the risks we face, now or in the future? No, we cannot; but yes, we must act as if we do. Some dangers are unknown; others are known, but not by us because no one person can know everything. Most people cannot be aware of most dangers at most times. Hence, no one can calculate precisely the total risk to be faced. How, then, do people decide which risks to take and which to ignore? On what basis are certain dangers guarded against and others relegated to secondary status? This book explores how we decide what risks to take and which to ignore, both as individuals and as a culture.
