CFM56-3C-1 high-bypass turbofan engines. Modifications to the landing gear to incorporate the larger engines was required. The "Classics" were larger, quieter and more economical, and also featured EFIS CRT avionics, replacing conventional instrumentation. In 1998, Boeing again heavily revised the 737, with the 600, 700, 800 and 900 ...

~~737 flight simulator~~

One of the advantages of the 737 NG over the 737 Classic is that Boeing allow for intermediate base C checks before the D check to reduce the time, work and expense required at the D check. Operators that have a maintenance programme with a P48 check can have a base check interval of eight phases (hence the name P8), where one phase = 500FH, and so have six base checks in the base maintenance ...
