The Engineering Drawing System Procedural Requirement establishes the procedural requirements and practices to be followed in the preparation, maintenance, control, and utilization of engineering drawings. It applies to all engineering drawings generated by Langley Research Center (LaRC) personnel and their supporting services contractors.

~~Engineering Drawing System - NASA~~

An engineering drawing is a type of technical drawing that is used to convey information about an object. A common use is to specify the geometry necessary for the construction of a component and is called a detail drawing. Usually, a number of drawings are necessary to completely specify even a simple component. The drawings are linked together by a master drawing or assembly drawing which gives the drawing numbers of the subsequent detailed components, quantities required, construction materia
