Thermo Scientific™ Vacutherm Vacuum Heating and Drying Ovens Dry up to six times faster than when using conventional units. These ovens feature excellent heat transfer and fast heating up time, minimizing operation time. A variety of options allow application-specific configurations.

---

Ovens - Fisher Scientific

The Fisher Scientific Isotemp 737F Oven is a medium-sized microprocessor-controlled forced air oven that provides improved improved temperature uniformity and control for faster drying. Fresh air enters through an air intake on the bottom of the oven, then is heated in a plenum below the chamber. A blower circulates the heated air into the wall plenums and the oven chamber itself in uniform flow patterns.
