We've been thinking about sex all wrong. Mainstream

media, movies, and porn have taught us that sex = penis + vagina, and everything else is just secondary. Standard penetration is how men most reliably achieve orgasm. The problem is, women don't orgasm this way. We've separated our most reliable route to orgasm—clitoral stimulation—from how we feel we should orgasm—penetration. As a result, we've created a pleasure gap between women and men: 50% of 18-35-year-old women say they have trouble reaching orgasm with a partner 64% of women vs 91% of men said they had an orgasm at their last sexual encounter 55% of men vs. 4% of women say they usually reach orgasm during first-time hookup sex

In *Becoming Cliterate*, psychology professor and human sexuality expert Dr. Laurie Mintz exposes the broader cultural problem that's perpetuating this gap, and what we can do about it. Pulling together evidence from biology, sociology, linguistics, and sex therapy into one comprehensive, accessible, and prescriptive book, *Becoming Cliterate* features:

- Cultural & historical analysis of female orgasm (spoiler: the problem's been going on for ages)
- An anatomy section (it's all custom under the hood)
- Proven techniques for cliterate sex (it starts with training the sex organ between your ears)
- A comprehensive final chapter for men (because you don't have to have a clitoris to be cliterate)

By dispelling the lies, misunderstandings, and myths that have been holding us back, *Becoming Cliterate* tackles both personal and political problems and replaces them with updated outlooks and practical skills needed to change our collective perspective on sex. It's time to finally inform women and men on how to have satisfying experiences in bed that benefit

both parties. The revolution is coming—and *Becoming Cliterate* offers a radical, simple solution to progress and pleasure for all.

Deals comprehensively and practically with effects, causes and behaviour of avalanches, protection of ski areas, highways and villages, and safety and rescue.

THE STORY: In Washington D.C., a widow named O is trying to figure out whether life is worth re-engaging with. In her path are the 1968 riots, the first Gulf War, the Freedom of Information Act and herself. There's also an archivist named Keith, a

Winner in its first edition of the Best New Undergraduate Textbook by the Professional and Scholarly Publishing Division of the American Association of Publishers (AAP), Kosky, et al is the first text offering an introduction to the major engineering fields, and the engineering design process, with an interdisciplinary case study approach. It introduces the fundamental physical, chemical and material bases for all engineering work and presents the engineering design process using examples and hands-on projects. Organized in two parts to cover both the concepts and practice of engineering: Part I, *Minds On*, introduces the fundamental physical, chemical and material bases for all engineering work while Part II, *Hands On*, provides opportunity to do design projects An Engineering Ethics Decision Matrix is introduced in Chapter 1 and used throughout the book to pose ethical challenges and explore ethical decision-making in an engineering context Lists of "Top Engineering Achievements" and "Top

This book offers a clearly written, entertaining and comprehensive source of medical information for both writers and readers of science fiction. Science fiction in print, in movies and on television all too often presents dubious or simply incorrect depictions of human biology and medical issues. This book explores the real science behind such topics as how our bodies adapt to being in space, the real-life feasibility of common plot elements such as suspended animation and medical nanotechnology, and future prospects for improving health, prolonging our lives, and enhancing our bodies through technology. Each chapter focuses on a single important science fiction-related subject, combining concise factual information with examples drawn from science fiction in all media. Chapters conclude with a "Bottom Line" section summarizing
