Guidelines Abnormal Pap Smears

The changes are almost always a sign of an HPV infection. ASC-US is the most common abnormal Pap test result. Low-grade squamous intraepithelial lesion (LSIL)—LSIL means that the cervical cells show changes that are mildly abnormal. LSIL usually is caused by an HPV infection that often goes away on its own.

Cervical Cancer Screening |  
ACOG  
Screening Guidelines. The  
American Cancer Society  
(ACS), ASCCP, and the  
American Society for  
Clinical Pathology (ASCP)  
have released guidelines for  
the prevention and early  
detection of cervical  
cancer. The guidelines  
generally advise a reduction  
in the number of tests women  
get over their lifetime to  
better ensure that they  
receive the benefits of  
testing while minimizing the  
harms, and include a  
preference for co-testing  
using the Pap test and HPV  
test for women age ages 30
