## Avoidance of Vibration Induced Fatigue Failure in Process Pipework

"Avoidance of Vibration Induced Fatigue Failure in Process Pipework" published by Energy Institute, 2008 (EI Guidelines) offer a screening method of FIV failure risk for beam mode pipe vibration, however this method is only for screening purpose and not suitable for detailed design. In EI Guidelines, the following screening method (outline) is introduced: (1) Calculate LOF (Likelihood of Failure) (2) Main line shall be redesigned. Small core connection should be assessed.
