2012 FLTRU Harley Davidson Twin Cam 103 ticking sound starts on cold start up (21,000 miles). It seems to go away after engine is warm. Bike still under warranty and dealer is suggesting carbon build up in head, wants to tear down engine. Not comfortable with that procedure. Bike runs great. Anything else that can be done, such as RingFree or Sea Foam?

2012 Harley-Davidson Twin Cam 103 V-Twin Engine Review
Noise sound more like the rocker shaft rotating in the support plate than a loose rocker arm but hard to distinguish between the two. Pull the rocker box cover and pull the rocker shafts and look for witness marks to confirm that the shaft is rotating. Set the piston at TDC so both valves are closed before loosening up the support plate.

Harley-Davidson Twin Cam engines are motorcycle engines made by Harley-Davidson since 1998. Although these engines differed significantly from the Evolution ...

Harley-Davidson Twin Cam 103 ci engine sound - YouTube
The main problem of the Twin Cam engine of the Harley Davidson is probably it 's the design aspect of the cam chain system. The actual design itself is designed poorly. It utilizes plastic shoes " riding " on the cam chains that can and will actually wear out in due time. Even with its brand new hydraulic tensioning system, this problem ...

Harley Davidson Twin Cam Engine Problems? What To Do ...
The cam chain system is a vital component in the functioning of a Harley 's Twin-Cam engine. Zeroing in on this specific cam component can make you as a buyer aware of its potentially faulty design. The cam chain system of a Harley is designed with plastic shoes that ride on the cam system. The plastic shoes will eventually wear out due to ...
