Human Factors in Flight. Flying is magical. As aviation safety scientists, we never forget how amazing is the experience of flight. Nor do we forget the skill and continual dedication exhibited by airline crews every single day. Our mission is to elevate and improve the experience of professional pilots, as well as flight attendants, so that more people will discover exciting and fulfilling careers as flight crew members.

Human Factors in Flight | Home

The late Captain Frank H Hawkins FRAes, M Phil, was Human Factors Consultant to KLM, for whom he had flown for over 30 years as line captain and R & D pilot, designing the flight decks for all KLM aircraft from the Viscount to the Boeing 747. In this period he developed and applied his specialization in Human Factors.

Human Factors in Flight | Taylor & Francis Group

Human Factors in Flight is about and for people who fly or have a concern on the ground for the safe and efficient operation of aircraft and is particularly well suited to those taking professional pilot exams. It brings the best of scientific knowledge to the practical management of the human component in flight.

Human Factors in Flight

Rebecca Chute MRAeS is the Principal Scientist and President of Human Factors in Flight LLC. Ms. Chute conducted human factors research in the Flight Human Factors branch at NASA Ames Research Center for 10 years. During that time, Ms. Chute performed seminal research into communication issues between pilots and flight attendants that have detrimental effects on safety of flight.

Human Factors in Flight | About

Preparing for human spaceflight takes several teams working together to provide a human centered design that includes human modeling, usability testing, analysis and evaluation.

Spaceflight Human Factors | NASA

Since the 1950s, a number of specialized books dealing with human factors has been published, but very little in aviation. Human Factors in Aviation is the first comprehensive review of contemporary applications of human factors research to aviation. A "must" for aviation professionals, equipment and systems designers, pilots, and managers—with emphasis on definition and solution of specific problems.
