~~Engine Cooling Parts for Hyundai i10 for sale | eBay~~
~~Your i10's cooling system works by cycling the engine coolant from the engine through the radiator. The water pump pushes the water through the entire system. The thermostat opens up once the engine reaches operating temperature and allows coolant in. If any part of this system fails, your i10 will eventually overheat.~~

~~Coolant, also called antifreeze or radiator fluid, circulates through your Hyundai's engine. Locate the coolant expansion (overflow) tank in the front, left of the engine bay. It is next to the oil dipstick, has a black cap and is tan in colour. Inspect the fluid level indicator on the side of the tank.~~

~~How to Fill Coolant in a Hyundai |~~
~~Coolant, also called antifreeze or radiator fluid, circulates through your Hyundai's engine. This regulates the temperature and prevents the engine from reaching temperatures that could damage it. Over time, it is common for coolant to evaporate or even leak a small amount of fluid from the overflow tank.~~

~~If it isn't, you'll need to top it up... TOPPING UP YOUR ENGINE COOLANT. To top up your engine's coolant, you can simply open the reservoir cap (be careful the engine is not too hot and use a cloth wrapped around the cap to open it, as there could be some residual pressure left in the system) and add to the fluid level - what you use to do this is very important though.~~
