Scientific information is increasingly being communicated at both national and international scientific conferences in the form of poster presentations. A recent international conference, for example, which involved nearly 500 delegates from over 50 different countries, included information presented in 331 posters. Recent experience has shown, however, that the presentational standard of such posters, even at the international level, varies immensely. Individuals presenting well-designed, eye-catching, and engaging posters are at a distinct advantage in promoting their scientific information. In doing so, they also promote themselves as credible scientists, as well as promoting the reputation of their establishments and countries of origin. However, producing a poster of high quality requires considerable planning and the acquisition of specific presentational skills. This book provides detailed practical guidance on all aspects of presenting scientific information in the form of posters. It is assumed that the presenter has access, either at home, at work, or through libraries, to a computer or word processor, a color printer, and photocopiers. The book is intended to help scientists to gain poster presentational skills in a manner that enables adoption of an individualistic style of presenting information in a credible fashion. The book has relevance internationally and is primarily targeted at research workers, including postgraduate students and all scientific professionals who are required to present visual communication of scientific information.

Beautifully designed A-Z of the totality of revolutionary politics. This brand new Crimethinc book is the action guide - the direct action guide. From affinity groups to wheatpasting, coalition building, hijacking events, mental health, pie-throwing, shoplifting, stenciling, supporting survivors of domestic violence, surviving a felony trial, torches, and whole bunch more. Incredible design, and lots of graphics give it that hip situ feel. Loads to read, to think about, and to do. At 650 pages, you could always throw the damn book at a suitable target. What are you waiting for?

First published in 2004. Routledge is an imprint of Taylor & Francis, an informa company.

Military Simulation (MILSIM) operations are not your run of the mill airsoft event. By their very nature, MILSIM events are intended to simulate military operations including the confusion and chaos that come with them. This training manual is not intended to teach basic airsoft skills or to provide recommendations for what equipment to buy for MILSIM events. Instead, it is about Tactics, Techniques and Procedures (TTPs) that will assist airsoft players, teams and other small tactical elements to out-manuever and defeat the opposing force to achieve victory at MILSIM events. This training manual begins by teaching airsoft players basic field-craft skills. Other topics including communications, close quarters battle techniques, battlefield formations, land warfare tactics, techniques and procedures

build on that basic foundation. It is also intended to teach teams and other small tactical elements how to move tactically on the MILSIM battlefield, how to use various forms of communication during operations, how to use drills to increase the survivability how to react to enemy contact, how to flank the enemy and how to use close quarters battle techniques and procedures to clear building rooms, hallways and stairways. It also explains the importance of communications, battle drills and security as well as how to apply these concepts to MILSIM. This tactical primer and training manual is designed to provide the tools to small teams and elements necessary to embrace the chaos on the MILSIM battlefield, to take the fight to the enemy and to achieve victory. More importantly, this tactical primer and training manual is intended to provide a framework for airsoft teams and tactical elements to modify the tactics, techniques and procedures contained herein to better fit their play style and to make them more effective. On the MILSIM battlefield, you must be more effective, more efficient and more flexible than your enemy to prevail. It is game of wits where the best tactics win.

This is the first book to pull together all of Hahnemann's other writings. It contains a number of valuable essays including his first major essay that defined homeopathy "essay on new curative principles for ascertaining the curative power of drugs " and many more. Experience for yourself Hahnemann's genius and genuine philanthropy in "Similia similibus curantur".
