Die optimale Vorbereitung auf die Fachsprachprüfung (FSP). Das Buch trainiert die sprachlichen Kompetenzen von Medizinerinnen, übt die notwendigen Strukturen und Muster ein wie z. B. das Arzt-Patienten-Gespräch, den Arztbrief und die Fallvorstellung. Neben den fachsprachlichen Zusammenhängen lernen Sie auch Empathie gegenüber den Patienten auszudrücken. Ganz nebenbei frischen Sie Ihre medizinischen Kenntnisse auf. Sie werden mit der gängigen Praxis in Deutschland vertraut gemacht und gezielt auf die FSP vorbereitet. Diverse Trainings simulieren die Prüfungssituation. Dazu gibt das Buch Hinweise, wie FSP-Kandidaten mit ihren Prüfungsängsten und typischen schwierigen Situationen umgehen können. Denn die FSP ist nicht zu

unterschätzen, mindestens 40% der Bewerber fallen durch.

Der "Zeeck" ist nicht umsonst das Standardwerk in der Chemie. Es ist Ihr perfekter Begleiter beim Einstieg in das Fach, aber auch bestens geeignet für alle schriftlichen oder mündlichen Testate während des Semesters und natürlich auch später für alle Examina sowie zum Nachschlagen. Neu in der 10. Auflage: Zu 20 chemischen Vorgängen und Prozessen gibt es online audiovisuelle Lernhilfen, die sich über QR-Codes im Buch aktivieren lassen. In diesen Videos werden chemische Reaktionen in kleinen Animationen in ihren Einzelschritten erklärt und so das Verständnis schwieriger Sachverhalte wesentlich erleichtert. Die wichtigsten funktionellen Gruppen organischer Moleküle werden am Ende des Buches auf zwei Seiten übersichtlich und einprägsam dargestellt. Auch der Spaß kommt nicht zu kurz: hinter einigen QR-Codes verbirgt sich ein animierter Bunso

This book presents a comprehensive neuropsychodynamic strategy for treating psychiatric disorders. Rather than pursuing an exclusively biological, psychological, or psychodynamic approach, it offers a methodology that links all three aspects in a unifying, integrative model. Central to this approach is the view of the brain as a bio-psychosocial organ in a neuro-ecological model, rather than the purely neuronal model often presupposed in current neuroscience and psychiatry. Moreover, the book views psychopathological symptoms as spatiotemporal disorders of the altered spatiotemporal structure spanning the brain and its surrounding world. The relation between one of the core symptoms and altered neuronal activity calls for the development of integrated, circular neuropsychodynamic models of psychopathological symptoms in severe psychiatric disorders and their treatment.

This volume is based on selected and updated papers from the symposium on "Basic Mechanisms of the EEG," which was held under the sponsorship of the German EEG Society in Hamburg on September 28-29, 1990. The intention of this symposium was to relate recent experimental, clinical, and neuropathological data on the basic mechanism that underlie the EEG. Although we know much about these mechanisms, there is still much more to be learned. The symposium was partly the continuation of an earlier symposium on "Origin of Cerebral Field Potentials" held in 1979 in Munster under the leadership of one of the present editors (E. -J. Speckmann) and H. Caspers. The present work combines new experimental and clinical results with state-of-the-art reports giving excellent general views. The first chapter presents a historical survey of the roots of current developments in neurophysiology. It seems that in the near future we may decipher the EEG, which we have considered up to now somewhat as a cryptogram (chapter 2). After chapter 3-a chapter concerned with more general points of the generation of cortical field potentials-chapters 4, 5, and 6 deal with several aspects and models of interactions and rhythms of cortical neurons. The role of glial cells in cortical electrical field generation is considered in chapter 7. Chapter 8 emphasizes the significance of brain metabolism.

Despite a worldwide reduction in its incidence, stroke remains one of the most common diseases generally and the most important cause of premature and persistent disability in the industrialized countries. The most frequent cause of stroke is a localized disturbance of cerebral circulation, i.e., cerebral ischemia. Less common are spontaneous intracerebral and subarachnoid hemorrhages and sinus venous thromboses. The introduction of new diagnostic procedures such as cranial computed tomography, magnetic resonance imaging, digital subtraction radiologic techniques, and various ultrasound techniques has led to impressive advances in the diagnosis of stroke. Through the planned application of these techniques, it is even possible to identify the

pathogenetic mechanisms underlying focal cerebral ischemia in humans. However, these diagnostic advances have made the gap between diagnostic accuracy and therapeutic implications even greater than before. This fact can be easily explained. In the past, therapeutic studies had to be based on the symptoms and temporal aspects of stroke; it was impossible for early investigations to consider the various pathogeneses of cerebral ischemia. Inevitably, stroke patients were treated as suffering from a uniform disease.

This multidisciplinary volume offers a systematic analysis of translation and interpreting as a means of guaranteeing equality under the law as well as global perspectives in legal translation and interpreting contexts. It offers insights into new research on • language policies and linguistic rights in multilingual communities • the role of the interpreter • accreditation of legal translators and interpreters • translator and interpreter education in multiple countries and • approaches to terms and tools for legal settings. The authors explore familiar problems with a view to developing new approaches to language justice by learning from researchers, trainers, practitioners and policy makers. By offering multiple methods and perspectives covering diverse contexts (e.g. in Austria, Belgium, England, Estonia, Finland, France, Germany, Hong Kong, Ireland, Norway, Poland), this volume is a welcome contribution to legal translation and interpreting studies scholars and practitioners alike, highlighting settings that have received limited attention, such as the linguistic rights of vulnerable populations, as well as practical solutions to methodological and terminological problems.

Präparieren? Sobotta Präparieratlas! - Angepasst an die 24. Aber halt - meinen teuren Atlas möchte ich nicht mitnehmen in den Präpariersaal, nur woher bekomme ich gute Abbildungen, die mir erklären, was ich am Körperspender wo genau sehe? Hier hilft der Sobotta Präparieratlas weiter! In diesem handlichen Atlas sind alle für das Präparieren wichtigen Sobotta-Abbildungen zusammengestellt, überaus realitätsnah, besonders detailliert wo nötig und zu speziellen Themen um echte Leichenfotos ergänzt. Das Präparierskript der Uni liefert die Anleitungen, der Sobotta Präparieratlas die Abbildungen dazu. Damit der gute Atlas zu Hause bleiben kann! Bilinguale Ausgabe Deutsch-Englisch mit lateinischer Nomenklatur The dissection course is due? Then the new Dissection Atlas is a must-have! This convenient hands-on atlas compiles all essential anatomic images necessary for successful dissection. Spiral binding and firm, wipeable pages make the Dissection Atlas the ideal companion for the dissection lab – combinable with all other atlases or lecture notes. Particularly detailed and realistic images make it easy to clearly recognise anatomic structures and, therefore, to master the real situation in the dissection lab. Ideally equipped for dissection class: Step by step: All body areas are bundled by chapter following the order in your course Layer by layer: Successive images allow effortless understanding of every single step in the dissection process For those who already study with the Sobotta Atlas: The chapter division is consistent with that of our three-volume Sobotta Atlas of Human Anatomy which facilitates consulting your books for reinforced learning. In addition, the original image numbers from the Sobotta Atlas are provided with each image – retrieval guaranteed! Bilingual Edition German - English with Latin Nomenclature
