This comprehensive report, published as part of the Football Players Health Study at Harvard University, more than two years in the making and 493 pages long, is an unprecedented step towards improving player health, concluding with several important recommendations. To date, there has been no analysis of the universe of stakeholders that may influence the health of NFL players, nor any systematic analysis of their existing or appropriate legal and/or ethical obligations. While clinical health care interventions are essential, player health also depends on understanding the wider context in which players work. The report examines 20 diverse stakeholders: NFL players, the NFL, the NFLPA, NFL club medical staff, second opinion, neutral and personal doctors, NFL clubs and personnel, NFL coaches, contract advisors, financial advisors, equipment managers and manufacturers, players' family members, officials, the media, NFL business partners, and fans. In total, the report makes 76 recommendations. Highlights of the key proposals are summarized below: * Conflicts of interest: The current arrangement under which a team's medical staff, including doctors and athletic trainers, have responsibility both to the players and to the club presents an inherent structural conflict of interest. A division of responsibilities between two distinct groups of medical professionals is needed to minimize such conflict and ensure that players receive medical care that is as unbiased and uninfluenced by competing interests as possible. Care and treatment should be provided by one set of medical professionals, called the "Players' Medical Staff," appointed by a joint committee with representation from both the NFL and NFLPA. The evaluation of players for business purposes should be conducted by a separate set of medical personnel, known as the "Club Evaluation Doctors." * Player health and adversarial collective bargaining: The NFL and NFLPA should refrain from making improvements to player health policies a "bargaining chip" in labor negotiations, to the extent that this is not already the case. Players should never be asked to trade their healthcare for other benefits in the collective bargaining process. * Ethical guidelines: Various stakeholders - including club doctors, athletic trainers, coaches, contract advisors, and financial advisors - should adopt, improve and enforce Codes of Ethics specific to the environment of the NFL. * Ongoing research into the health effects of the game: The NFL and NFLPA should continue to initiate and support efforts to scientifically and reliably identify the health risks and benefits of playing professional football. * Access to data: The NFL and, to the extent possible the NFLPA, should make aggregate, de-identified injury data publicly available for independent reanalysis. They should also continue to improve their robust collection of data and offer it to qualified professionals for analysis. * Meaningful penalties: The collective bargaining agreement (CBA) should be amended to impose meaningful fines for any club or person found to have violated Sections 1 through 6 of Article 39 of the 2011 CBA (players' rights to medical care and treatment). * Investing in players' health and care: The NFLPA should consider investing greater resources to investigate and enforce player health issues and enforce player rights, including Article 39 of the CBA. Published alongside the report are a list of the Top 10 Recommendations in the report (also included in the Executive Summary at the beginning of the report), and A Patient Bill of Rights for NFL Players - including current and proposed rights under the CBA, NFL policy, law and/or codes of ethics (which can be found on the Football Players Health Study at Harvard University website).

Boards of directors are sitting ducks. Shareholders complain and even attack, management manipulates, and individual board members have little power, able to act only as part of the board as a whole. Governance issues are front and center, yet there is often little understanding, even among board members, of the key role that they play. Written in an accessible and human voice, The Governance Revolution: What Every Board Member Needs to Know, NOW! provides information and context essential to anyone seeking to understand how corporations and their stewards—the board of directors—can and should function in the volatile world we inhabit. Deborah Hicks Midanek offers useful insight into what board members of corporations actually do, the current standards for board members and why they exist. She includes a timely discussion of how clarity of purpose can improve board and director effectiveness. Informed by her long experience serving public, private, and family owned corporate boards as well as those of charitable, and government organizations, she provides essential context regarding the evolution of board practice as well as candid discussion of the issues involved in the relentless effort to improve corporate governance processes. Focused mainly on the dominant public corporation, she also explores the special challenges of serving private and family owned as well as nonprofit and public agency boards. Written by a seasoned board member, and liberally laced with stories and cases illustrating the tricky issues directors wrestle with, this book is the essential common-sense companion for anyone working with a board, serving on a board, or wanting to do so. Directors, aspiring directors, investors, and students of corporate behavior will benefit from this highly readable description of the cloistered boardroom. This book, written by leading international experts, provides a comprehensive, current examination of transport-mediated antimicrobial resistance. As a particularly powerful mechanism of multidrug resistance, an in-depth examination of efflux pumps is conducted with bacteria of major public health concern including Enterobacteriaceae, Acinetobacter, Neisseria, Pseudomonas, staphylococci, and mycobacteria. The content spans structural biochemistry and transport mechanisms of the major transporter families and considers individual drug efflux systems across various Gram-positive and Gram-negative species. Genomic analysis of efflux pump distribution and their contribution to clinically-relevant resistance are a major focus of the text. Moreover, interplay between drug efflux pumps and other key resistance mechanisms such as intrinsic drug impermeability, inactivation, and target alterations are discussed, as well as their molecular expression-based regulation and physiological functions beyond resistance, involving biofilms, stress response, and pathogenicity. Finally, strategies are addressed to target this drug resistance mechanism with novel antimicrobials or drug inhibitor adjuvants.

The book presents high-quality research papers presented at the 2nd American University in the Emirates International research conference, AUEIRC'18, organized by the American University in the Emirates, Dubai, held on November 13th-15th, 2018. The book is broadly divided into four sections: Sustainability and Smart Technology, Sustainability and Social Responsibility, Sustainability, Human Security and Legislation, Sustainability and Education. The topics covered under these sections are sustainable smart technology such as developing green curriculum for information technology, use ultrasonic velocity to predict quality of wheat, improve security features for visa system, factors affecting the cost of production of electricity and desalination plants, impact of smart traffic sensing in smart cities, smart healthcare system, simulation of Grey wolf optimization algorithm in painting digital forensics. The topics covered for sustainability and creative industries such as sustainable concrete production, multimedia applications in digital transformation art, integrating biomimicry principles in sustainable architecture. Sustainability, human security and legislation covered topics of urban performance and sustainable environment, Eco-certification as response on climate change, the criminal offence of tax evasion in law: case study, skills engineering in sustainable counter defense against Cyber extremism, the international law and challenges of trans-boundary water resources governance, the legal status of nuclear energy: case study, sustainable energy development and nuclear energy legislation in UAE, corruption specific safety challenge, environmental management and sustainability, sustainable farming models for desert agro-ecosystems, future directions of climate change, earth and built environment towards new concept of sustainability, institution building from emotional intelligence perspective, virtue ethics, technology and sustainability, the role of humor in a sustainable education, HEIs practices and strategic decisions toward planning for sustainable education programs, TQM in higher education for sustainable future. The papers in this book present high-quality original research work, findings and practical development experiences.

This book provides human resource managers with the information necessary to cope with the ethical, legal, and financial issues surrounding AIDS. Masi offers a comprehensive Program Integration Model approach to managing the disease and shows how to develop effective policies, implement educational programs, and adapt existing Employee Assistance Programs to provide the most cost-effective and comprehensive service to employees dealing with AIDS. She also addresses the particular concerns of special populations, provides current legal information to help the employer avoid costly litigation, and reviews actual policies employed by major corporations in both the public and private sectors.

Crime is usually territorial. It is a matter of the law of the place where it occurs. Nevertheless, a surprising number of American criminal laws apply outside of the U.S. Application is generally a question of legislative intent, expressed or implied. In either case, it most often involves crimes committed aboard a ship or airplane, crimes condemned by international treaty, crimes committed against government employees or property, or crimes that have an impact in this country even if planned or committed in part elsewhere. Although the crimes over which the U.S. has extraterritorial jurisdiction may be many, so are the obstacles to their enforcement. Contents of this report: (1) Introduction; (2) Constitutional Considerations; (3) Conclusion; (5) Bibliography.

Provides the first major effort to test the rules and regulations that underlie current practices in union elections and, at the same time, explores the role played by the National Labor Relations Board in regulating these elections. The book reports the findings of an empirical field study of thirty-one union representation elections involving over 1,000 employees to determine their pre-campaign attitudes, voting intent, actual vote, and the effect of the campaign on voting. It focuses on campaign issues, unlawful campaigning, working conditions, demographic factors, job-related variables, and other topics.

This book collects up-to-date advanced protocols and advice from leading experts in the area of membrane protein biology that can be applied to structural and functional studies of any membrane protein system. The contents explore methods for cloning and expression of membrane proteins and membrane protein complexes in prokaryotic and eukaryotic systems, approaches for protein purification, nanobody applications, as well as biophysical characterization and much more. Written for the highly successful Methods in Molecular Biology series, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and tips on troubleshooting and avoiding known pitfalls. Authoritative and thorough, Expression, Purification, and Structure Biology of Membrane Proteins serves to guide and encourage young researchers and newcomers to the field to tackle bold new studies on membrane proteins. Chapter 11 is available open access under a CC-BY 4.0 license via link.springer.com.
