This table provides a preferred order to the testing of muscle groups for manual muscle testing. Generally, for bilateral muscle testing, each muscle group is first tested on the right and then the left, prior to proceeding to the next muscle group in the list. Some muscle groups are listed here with anti-gravity testing, but for a weaker patient, these would be tested in a sidelying or supine position, per the table below (Testing Positions); the re-test for a weaker patient is indicated in ...
