Designed to help cross the divide between academic research and practical experience in spirituality, this publication is designed for those who are believers in the Northern faiths. Whether it be Asatru, Teutonic, Celtic, Anglo-Saxon or any other faith which is indigenous to Northern Europe.

Fragments of ancient belief mingle with folklore and Christian dogma until the original tenets are lost in the myths and psychologies of the intervening years. Hilda Ellis Davidson illustrates how pagan beliefs have been represented and misinterpreted by the Christian tradition, and throws light on the nature of pre-Christian beliefs and how they have been preserved. *The Lost Beliefs of Northern Europe* stresses both the possibilities and the difficulties of investigating the lost religious beliefs of Northern Europe.

James Macpherson's *Poems of Ossian*, said to be translations from the Gaelic of a third-century bard, caused a sensation on their first appearance in the early 1760s. Contrary to the impression often conveyed in literary histories, enthusiasm for the poetry of the 'Homer of the North' cannot be dismissed as a short-lived fad, for its appeal lasted a century or more, both at home and abroad. There is hardly a major Romantic poet on whom it failed to make a significant impact. In the words of Sir Walter Scott, it succeeded in "giving a new tone to poetry throughout all Europe" and its influence was ubiquitous, from Poland to Portugal, from Paris to Prague. The essays brought together here consider the reception of *Ossian* in England, Scotland, Wales and Ireland, as well as in a wide range of European countries. In some the focus is on individual writers (for instance, Goethe, Schiller, Chateaubriand, Espronceda), in others there is a broader sweep and a survey of reception in a national literary culture is offered (for instance, Hungary, Russia, Sweden). One of the two essays on *Ossian* in Italy at last gives Macpherson's influential epigone, John Smith, his due. Consideration is also given to *Ossian*'s significance for the rise of historicism, and to non-literary forms of reception in music and art.

Available for the first time in English, this is the definitive account of the practice of sexual slavery the Japanese military perpetrated during World War II by the researcher principally responsible for exposing the Japanese government's responsibility for these atrocities. The large scale imprisonment and rape of thousands of women, who were euphemistically called "comfort women" by the Japanese military, first seized public attention in 1991 when three Korean women filed suit in a Toyko District Court stating that they had been forced into sexual servitude and demanding compensation. Since then the comfort stations and their significance have been the subject of ongoing debate and intense activism in Japan, much if it inspired by Yoshimi's investigations. How large a role did the military, and by extension the government, play in setting up and administering these camps? What type of compensation, if any, are the victimized women due? These issues figure prominently in the current Japanese focus on public memory and arguments about the teaching and writing of history and are central to efforts to transform Japanese ways of remembering the war. Yoshimi Yoshiaki provides a wealth of documentation and testimony to prove the existence of some 2,000 centers where as many as 200,000 Korean, Filipina, Taiwanese, Indonesian, Burmese, Dutch, Australian, and some Japanese women were restrained for months and forced to engage in sexual activity with Japanese military personnel. Many of the women were teenagers, some as young as fourteen. To date, the Japanese government has neither admitted responsibility for creating the comfort station system nor given compensation directly to former comfort women. This English edition updates the Japanese edition originally published in 1995 and includes introductions by both the author and the translator placing the story in context for American readers.

Each number includes "Reviews and book notices."

One of the world's leading specialists in Indo-European religion and society, Bruce Lincoln expresses in these essays his severe doubts about the existence of a much-hypothesized prototypical Indo-European religion. Written over fifteen years, the essays—six of them previously unpublished—fall into three parts. Part I deals with matters "Indo-European" in a relatively unproblematized way, exploring a set of haunting images that recur in descriptions of the Otherworld from many cultures. While Lincoln later

## Bookmark File PDF Mimir Journal Of North European Traditions

rejects this methodology, these chapters remain the best available source of data for the topics they address. In Part II, Lincoln takes the data for each essay from a single culture area and shifts from the topic of dying to that of killing. Of particular interest are the chapters connecting sacrifice to physiology, a master discourse of antiquity that brought the cosmos, the human body, and human society into an ideologically charged correlation. Part III presents Lincoln's most controversial case against a hypothetical Indo-European protoculture. Reconsidering the work of the prominent Indo-Europeanist Georges Dumézil, Lincoln argues that Dumézil's writings were informed and inflected by covert political concerns characteristic of French fascism. This collection is an invaluable resource for students of myth, ritual, ancient societies, anthropology, and the history of religions. Bruce Lincoln is professor of humanities and religious studies at the University of Minnesota.

"The age of Socratic man is past: crown yourselves with ivy, grasp the thyrsus and do not be amazed if tigers and panthers lie down fawning at your feet. Now dare to be tragic men, for you will be redeemed. You shall join the Dionysiac procession from India to Greece! Gird yourselves for a hard battle, but have faith in the miracles of your god!" -Friedrich Nietzsche  
Kratos contains the diversity and multifaceted components of thought which combine together to create the Hellenic Tradition - philosophy, mythology, archaeology, esotericism, mysticism, spirituality and paganism in the form of Hellenismos. All of those topics are integral components in the rich and vibrant culture heritage of Greece. Whilst some of these authors will delve deep into the ancient past via texts and archaeological discoveries, others will look towards the future for the Greek culture and keep their practices alive via Hellenismos. Kratos therefore, contains articles for those who love the past and those who love the future and carry the Hellenic Tradition onwards as one of the European continents oldest surviving Traditions. Not Dead but Dreaming: Oneiromancy and Necromancy in the Hellenic Tradition - Gwendolyn Taunton

accessible way, as a series of building blocks that lead the user to understand key technologies, why they are required, and how to integrate them into Semantic Web applications. Natural language processing and Semantic Web technologies have different, but complementary roles in data management. Combining these two technologies enables structured and unstructured data to merge seamlessly. Semantic Web technologies aim to convert unstructured data to meaningful representations, which benefit enormously from the use of NLP technologies, thereby enabling applications such as connecting text to Linked Open Data, connecting texts to each other, semantic searching, information visualization, and modeling of user behavior in online networks. The first half of this book describes the basic NLP processing tools: tokenization, part-of-speech tagging, and morphological analysis, in addition to the main tools required for an information extraction system (named entity recognition and relation extraction) which build on these components. The second half of the book explains how Semantic Web and NLP technologies can enhance each other, for example via semantic annotation, ontology linking, and population. These chapters also discuss sentiment analysis, a key component in making sense of textual data, and the difficulties of performing NLP on social media, as well as some proposed solutions. The book finishes by investigating some applications of these tools, focusing on semantic search and visualization, modeling user behavior, and an outlook on the future.
