Current music recommendation algorithms try to accurately predict what people demand to listen to. However, quite often these algorithms tend to recommend popular —or well-known to the user— music, decreasing the effectiveness of the recommendations. These approaches focus on improving the accuracy of the recommendations. That is, try ...

In the last 15 years we have seen a major transformation in the world of music. Musicians use inexpensive personal computers instead of expensive recording studios to record, mix and engineer music. Musicians use the Internet to distribute their music for free instead of spending large amounts of money creating CDs, hiring trucks and shipping them to hundreds of record stores.
