A new edition of a highly respected textbook and reference in the rapidly emerging field of equitation science. Equitation Science, 2nd Edition incorporates learning theory into ethical equine training frameworks suitable for riders of any level and for all types of equestrian activity. Written by international experts at the forefront of the development of the field, the welfare of the horse and rider safety are primary considerations throughout. This edition features a new chapter on research methods, and a companion website provides the images from the book in PowerPoint.

Invasive alien species are a major threat to biodiversity and ecosystems throughout the world. In India, a country with four of the world's most important 'biodiversity hotspots', the invasion of alien plants means risking a national ecological disaster with major social and economic consequences. Currently, there is insufficient information about invasive alien plants: their distribution, rate of spread and adaptability to new environments. This book reveals existing and potential invaders, evaluates the level of risk they pose to native species and suggests steps to manage spread and limit damage. Invaluable to policy-makers, this book is also required reading for researchers of invasive plants worldwide.

Lesser Feasts and Fasts has not been updated since 2006. This new edition, adopted at the 79th General Convention (resolution A065), fills that need. Biographies and collects associated with those included within the volume have been updated; a deliberate effort has been made to more closely balance the men and women represented within its pages.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State;and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years;it has been suggested that an account of my life and fortunes would not be uninteresting to the public."-an excerpt

Continues the historical outline of Franklin County and describes the remaining counties.

Even those who don't like math are interested in food. Kitchen Math serves up 38 activities connecting basic math operations to purchasing, preparing, cooking, and serving different dishes. What's really the best price on yogurt? How long should you cook the eggs? How do you read nutrition labels? Your students will practice fundamental math skills while they solve real-life cooking, shopping, and planning scenarios. Comprehensive teacher materials include lesson objectives, teaching notes, pre- and post-tests, and complete answer keys.
