Development Connections takes stock of recent advances in what is broadly known as Information and Communication Technologies (ICTs). The authors seek to discover how information and telecommunication technologies affect both the public and private sectors in Latin America and how they can optimize ICT returns to society.

This book is open access under a CC BY 4.0 license. This text offers a comprehensive and nuanced view of the economic development of Spain since 1850. It provides a new set of historical GDP estimates for Spain from the demand and supply sides, and presents a reconstruction of production and expenditure series for the century prior to the introduction of modern national accounts. The author splices available national accounts sets over the period 1958-2015 through interpolation, as an alternative to conventional retropolation. The resulting national accounts series are linked to the historical estimates providing yearly series for GDP and its components since 1850. On the basis of new population estimates, the author derives GDP per head, decomposed into labour productivity and the amount of work per person, and placed into international perspective. With theoretical reasoning and historiographical implications, Prados de la Escosura provides a useful methodological reference work for anyone interested in national accounting. Open Access has been made possible thanks to Fundación Rafael del Pino's generous support. You can find the full dataset here: <http://espacioinvestiga.org/bbdd-chne/?lang=en> 'This book stands among the classics for the Kuznetian paradigm in empirical economics. This is the definitive study of Spain's transition to a modern economy.' -Patrick Karl O'Brien, Emeritus Fellow at St. Antony's College, the University of Oxford, UK, and Professor Emeritus of Global Economic History at the London School of Economics and Political Science, UK 'The definitive account of Spanish economic growth since 1850, based firmly on a magisterial reconstruction of that country's national accounts and an unrivalled knowledge of both Spanish and global economic history of the period.' -Stephen Broadberry, Professor of Economic History at Nuffield College, the University of Oxford, UK

In this new and expanded edition of Chossudovskys international best-seller, the author outlines the contours of a New World Order which feeds on human poverty and the destruction of the environment, generates social apartheid, encourages racism and ethnic strife and undermines the rights of women. The result as his detailed examples from all parts of the world show so convincingly, is a globalisation of poverty. This book is a skilful combination of lucid explanation and cogently argued critique of the fundamental directions in which our world is moving financially and economically. In this new enlarged edition -- which includes ten new chapters and a new introduction -- the author reviews the causes and consequences of famine in Sub-Saharan Africa, the dramatic meltdown of financial markets, the demise of State social programs and the devastation resulting from corporate downsizing and trade liberalisation. The book has been published in 11 languages. Over 100,000 copies sold world-wide.

The Annual Report on Exchange Arrangements and Exchange Restrictions has been published by the IMF since 1950. It draws on information available to the IMF from a number of sources, including that provided in the course of official staff visits to member countries, and has been prepared in close consultation with national authorities.
