If people are to be productive and creative at work, they need to be happy within their job. Job satisfaction allows the creation and delivery of quality products and services. Within this new edition of his book, the author uses his extensive experience to discuss some possibilities to increase job satisfaction. A key approach included is the management of the knowledge in the organization as an effective replacement to the traditional hierarchical and patriarchal approach. This book clarifies how practical knowledge management can be implemented within an organization, giving the day-to-day decision making to the people responsible for the products and services you provide your clients.

The traditional organizational structure is based on an antique structure of kings and barons vying for authority within their boundaries. In the twenty-first century, this structure is no longer fit for purpose and needs to be replaced with something more suitable.The author of this book touches on topics related to the need for respect for humanity, culture and independence of thought of the individual in an organizational structure that is focused on the smooth flow of information and knowledge. The purpose of the organization, whether a multinational or a team is to ensure that the right knowledge reaches the right individual at the right time. Only then can the unique skills, experience and competency of the individual can be used to their best for the benefit of the customer, the team member and the organization itself.

Through an examination of relevant biblical passages, this theologian-pastor presents an alternative "open view" to the classical doctrine on God's foreknowledge of the future.

This two-volume set LNCS 11625 and 11626 constitutes the refereed proceedings of the 20th International Conference on Artificial Intelligence in Education, AIED 2019, held in Chicago, IL, USA, in June 2019. The 45 full papers presented together with 41 short, 10 doctoral consortium, 6 industry, and 10 workshop papers were carefully reviewed and selected from 177 submissions. AIED 2019 solicits empirical and theoretical papers particularly in the following lines of research and application: Intelligent and interactive technologies in an educational context; Modelling and representation; Models of teaching and learning; Learning contexts and informal learning; Evaluation; Innovative applications; Intelligent techniques to support disadvantaged schools and students, inequity and inequality in education.

In 2005 Hurricane Katrina posed an unprecedented set of challenges to formal and informal systems of disaster response and recovery. Informed by the Virginia School of Political Economy, the contributors to this volume critically examine the public policy environment that led to both successes and failures in the post-Katrina disaster response and long-term recovery. Building from this perspective, this volume lends critical insight into the nature of the social coordination problems disasters present, the potential for public policy to play a positive role, and the inherent limitations policymakers face in overcoming the myriad challenges that are a product of catastrophic disaster. Soon after Hurricane Katrina wreaked its havoc, the Mercatus Center at George Mason University launched the Gulf Coast Recovery Project. The project assembled a team of researchers to examine the capacity within political, economic, and civic life to foster robust response and recovery. Building on both quantitative and qualitative analysis, the contributors to this volume seek to understand the recovery process from the ground up from the perspective of first-responders, residents, business-owners, non-profit directors, musicians, teachers, and school administrators, and how ordinary citizens respond to the formal and informal rules of the post-disaster policy context. Personal, political and poignant, The Political Economy of Hurricane Katrina and Community Rebound will appeal to economists interested in the political economy of disaster and disaster recovery, disaster specialists, and general readers interested in the challenges those affected by Hurricane Katrina have faced, and are facing, and their prospects for recovering from the 2005 disaster.

Media, Development, and Institutional Change investigates mass media s profound ability to affect institutional change and economic development. The authors use the tools of economics to illuminate the media s role in enabling and inhibiting political economic reforms that promote development. The book explores how media can constrain government, how governments manipulate media to entrench their power, and how private and public media ownership affects a country s ability to prosper. The authors identify specific media-related policies governments of underdeveloped countries should adopt if they want to grow. They illustrate why media freedom is a critical ingredient in the recipe of economic development and why even the best-intentioned state involvement in media is more likely to slow prosperity than to enhance it. Scholars and students of economics, political science and sociology; policy-makers, analysts and others in the development community; and academics in media studies will find this book insightful and provocative.

(Educational Piano Library). Piano Practice Games presents imaginative ways to introduce pieces in Piano Lessons by coordinating technique, concepts, and creativity with the actual music in the Piano Lessons books. These preparation activities help focus learning by 'playing with' each lesson piece aurally, visually, and physically. Whether used in individual or group lessons, Piano Practice Games are all designed to make music. Many activities include accompaniments that can be added by the teacher or by using the CD or GM disk from the corresponding Piano Lessons book.

It is common knowledge that, in rich societies, the poor have worse health and suffer more from almost every social problem. This book explains why inequality is the most serious problem societies face today.
