Quadratic Unit

The function $f(x) = ax^2 + bx + c$ is a quadratic function.

The graph of any quadratic function has the same general shape, which is called a parabola. The location and size of the parabola, and how it opens, depend on the

Where To Download P 374

values of a , b , and c . As shown in Figure 1, if $a > 0$, the parabola has a minimum point and opens upward. If $a < 0$, the parabola has a maximum point and opens downward.
