All mathematical

Eventually, a

emerges which,

are derived more

integrates human
biological data
relevant to
health and
disease with
both
evolutionary

environments that more often than not produce major challenges to health and survival.

Because students who take this fastest-growing anthropology course come from a variety of disciplines (anthropology,

med students,
and health

sciences,

especially), the

text does not

assume anything

beyond a basic

level

familiarity with

human biology

and

The authors first present basic biological information on a particular health condition and then expand their analysis to include evolutionary, historical, and cross-cultural perspectives.
