this unless, under the expression " raised thee up," he had meant to comprehend that purpose of God, by which Pharaoh was ordained to magnify, by his obstinacy, the redemption of God's people, Israel. For if any one should say, that Pharaoh's being "raised up" signified his being raised from above to the summit of kingly honour; that indeed is some part, but not the whole, of the matter. For the LXX. Greek interpreters have here used the same expression as that by which they render the verb Hiphil, derived from the radical Kum "to arise." Moreover, God is said to "raise up" that, which He causes, by an outstretched arm, as it were, to accomplish the end He has ordained. The Scripture here principally looks at the beginning, or first-cause, of that which it is

recording; that it may ascribe the whole to God alone. In this same manner, God is also said to "raise up " prophets, and ministers of salvation; that no man might claim any of these things to himself, on the ground of his own industry. Therefore, the meaning of Moses has been faithfully expressed by the term, "raised up," if you will but so receive it; nor did Paul receive it otherwise. And most certainly, the expression "raised up" comprehends, not less distinctly than summarily, what he had touched upon, both concerning the elect, and the reprobate; since he is claiming for God the right and the power to have mercy on whom He will, and to harden whom He will, according to his own pleasure and purpose. The apostle therefore maintains, that the right of hardening, and of showing mercy, is in the power

of God alone; and that no law can be imposed on him as a rule for his works; because no law or rule can be thought of, ...

Arthur McCallum, a young English policeman, discovers the truth about his own destiny when he and Melchior, apprentice to the wizard Merlin, battle the evil forces of Mordred, in a modern version of the Arthurian legend

CONNEXITY is the philosophical counterpart to Will Hutton's essentially political book. It looks at the profound tension that exists between two recent achievements of humanity: greater freedom (over how to live, who to love, what to believe and say, where to trade), and greater interdependence, or 'connexity' (through the financial markets, military structures, the

internet, the ecosystem). This tension has led to crisis: institutions, including governments, sense themselves to be inadequate; individuals are faced with a mass of conflicting information and values. The issue we face, which will ultimately determine human survival in our densely packed planet, is how the tension between these two can be resolved, and a new order established. Mulgan presents his own powerful solution to this crisis. It is based around the notion of 'connexity': breaking down our rigid sense of ourselves as isolated units and seeing our lives as part of a system, a positive network of co-responsibility.

This book is a step-by-step practical guide on how to achieve successful projects in EPC/turnkey contracting and construction. Mapping out the

shape of a project, the book spells out where things often go wrong, where and why disputes arise, and how to avoid conflicts. It is a key reference point for all involved in the contract, making it attractive to legal practitioners, construction industry professionals, and government officials involved with these projects.

When Henry gets called back to the Faerie Realm to help his friends, Holly and Pyrgus, he has to be braver and more resourceful than he could ever have thought possible. When Pyrgus and Holly are confronted with their greatest fear, they too have to prove themselves to be courageous beyond their own expectations. With the help of Mr Fogarty and the marvellous Madame Cardui, the futures of these brilliant young protagonists are worked

out in a masterful plot that will hold the reader gripped from start to finish.

The Globus Toolkit is a key technology in Grid Computing, the exciting new computing paradigm that allows users to share processing power, data, storage, and other computing resources across institutional and geographic boundaries. Globus Toolkit 4: Programming Java Services provides an introduction to the latest version of this widely acclaimed toolkit. Based on the popular web-based The Globus Toolkit 4 Programmer's Tutorial, this book far surpasses that document, providing greater detail, quick reference appendices, and many additional examples. If you're making the leap into Grid Computing using the Globus Toolkit, you'll want Globus Toolkit 4: Programming Java Services

at your side as you take your first steps. Written for newcomers to Globus Toolkit, but filled with useful information for experienced users. Clearly situates Globus application development within the context of Web Services and evolving Grid standards. Provides detailed coverage of Web Services programming with the Globus Toolkit's Java WS Core component. Covers basic aspects of developing secure services using the Grid Security Infrastructure (GSI). Uses simple, didactic examples throughout the book, but also includes a more elaborate example, the FileBuy application, that showcases common design patterns found in Globus applications. Concludes with useful reference appendices.

of the 2019 European Parliament (EP) elections, this innovative book provides a critical assessment of where Europe stands in terms of the quest to achieve democratic legitimacy. Since the 2014 EP elections, the European Union (EU) has experienced multiple crises, which arguably have undermined its legitimacy. The 2019 EP elections were hence seen as a crucial moment in the EU's attempts to show resilience and regain trust. Using political science and legal frames of analysis, *Assessing the 2019 European Parliament Elections* provides an understanding and assessment of the current politico-legal framework, and its impact on European elections. Furthermore, using original data, it provides a timely examination of public opinion issue

priorities and voting behaviour at the 2019 EP elections in eight countries. Given the critical conjuncture that the 2019 EP elections represent, this volume provides a key contribution to understanding both the dynamics surrounding the elections, as well as voters' responses, and informs debates on European politics, for example, second-order elections, democratic legitimacy and political representation. This book will be of key interest to scholars and students of EU politics, public administration, European studies, European law, and sociology, along with practitioners in politics, journalism, and policy analysis.

one aspect of life on a high-school debate team. Teenage debaters also participate in a distinct cultural world--complete with its own jargon and status system--in which they must negotiate complicated relationships with teammates, competitors, coaches, and parents as well as classmates outside the debating circuit. In *Gifted Tongues*, Gary Alan Fine offers a rich description of this world as a testing ground for both intellectual and emotional development, while seeking to understand adolescents as social actors. Considering the benefits and drawbacks of the debating experience, he also recommends ways of reshaping programs so that more high schools can use them to boost academic performance and foster specific skills in citizenship. Fine

analyzes the training of debaters in rapid-fire speech, rules of logical argumentation, and the strategic use of evidence, and how this training instills the core values of such American institutions as law and politics. Debates, however, sometimes veer quickly from fine displays of logic to acts of immaturity--a reflection of the tensions experienced by young people learning to think as adults. Fine contributes to our understanding of teenage years by encouraging us not to view them as a distinct stage of development but rather a time in which young people draw from a toolkit of both childlike and adult behaviors. A well-designed debate program, he concludes, nurtures the intellect while providing a setting in which teens learn to make better behavioral choices, ones that will shape relationships in
