Solving Problems To help yourself  
think about a problem you are solving  
more abstractly, it is useful to give  
yourself some distance from that  
problem. There are several ways to  
create that distance. Imagine that you  
are solving the problem for someone  
else rather than for yourself.

You will apply a second form of the abstraction problem-solving technique, called using templates, to solve a solution issue by using a graphics library. You will then use lexics, syntax, and semantics to learn two new Python statements (assignment, import), two new Python expressions (binary expression, attribute reference), and one new Python type (module).
