In 2014, cancer research represents over 4 % of all re-search performed globally, reflecting the huge amount of

Cancer Research - Elsevier
Untitled-1 2 29/10/14 09:42. Cancer is among the leading causes of death worldwide, accounting for 8.2 million deaths in 2012 according to the World Health Organization. According to the same source, it is expected that annual cancer cases will rise from 14 million in 2012 to 22 million by 2030. Research on cancer development, treatment and prevention, as well as basic research in this area, is essential to reduce the burden of this disease.

Cancer research
In summary, I strongly believe that this paper illustrates extremely well what is wrong with biomedical research. It chooses an isolated association of protein and cancer, selects supporting evidence — all reductionist — and ignores both the contrary specific evidence and the extensive evidence concerning other disease outcomes.

Bladder Cancer Research Paper - iResearchNet
Cancer is a very complex disease and research geared towards learning more about its origin, progression, and treatments. Medical researches use animals to study cancer for a variety of reasons. Animals have shorter lifespans and more rapid generation times compared to humans, and disease progression moves forward at a more rapid pace, so results of studies using animals as models are obtained quicker.3.
