NIJ Guide-0101.06 is a companion document to NIJ Standard-0101.06, Ballistic Resistance of Body Armor. The previous guide published by NIJ on body armor, NIJ Guide 100-01, Selection and Application Guide to Personal Body Armor, was released in 2001. NIJ Guide-0101.06 incorporates new knowledge about ballistic-resistant armor that has been gained in the intervening 13 years as the result of both NIJ-funded research and research funded by others.

Selection of the proper dust abatement program must include an understanding of not only the above factors, but the total long-term cost and environmental impacts of that program. Long-term costs include road improvement, road preparation, application of the suppressant in conjunction with the number of times the palliative needs to be applied, and expected changes in maintenance practices.

The selection process. The selection process is aimed at finding and hiring the best candidates for job openings. This process is often depicted as a funnel. 50 candidates may apply to a function, five of them are invited for an in-person interview, and one person is selected in the end. The selection process always starts with a job opening.

This application guide describes an RTAC implementation of DF1, a robust but simple serial-line protocol that can read and write data from and to an Allen-Bradley PLC. The protocol is implemented with the use of an acSELeRator RTAC extension package. Use of the DF1 protocol eliminates the requirement for third-party hardware and programming to connect the SEL RTAC and Allen-Bradley
