With global commitments and combat duty, our armed forces face life-threatening challenges on a daily basis. However, less visible threats also impact the mental health of our military men and women. Experts examine challenges on the battlefield, such as women coming to terms with life after being prisoners of war, or soldiers dealing with mistakenly killing civilians. But life in the armed forces presents less dramatic, daily challenges. Away from the front lines, soldiers have to raise their families, sometimes as single parents. Children have to learn what it's like to be in a military family, and to make sense of war. Gay or lesbian officers cope with a don't ask, don't tell policy. An unprecedented range of contributors—military officers, medical doctors, psychologists, psychiatrists, and professors—take us onto the bases and the battlefields and inside the minds of military personnel who face far greater challenges than most of us ever see in the headlines. These volumes also highlight factors that make members of the military resilient and stable, as well as programs and practices that can ease the psychological burdens of military personnel, families, and children. Readers can better understand how society views our military and military operations, and how each one of us can play a role in supporting our armed forces.

Air Force Handbook 10-644 Survival Evasion Resistance Escape (SERE) Operations 27 March 2017 This handbook describes the various environmental conditions affecting human survival, and describes isolated personnel (IP) activities necessary to survive during successful evasion or isolating events leading to successful recovery. It is the fundamental reference document providing guidance for any USAF service member who has the potential to become isolated; deviations require sound judgment and careful consideration. This publication provides considerations to be used in planning and execution for effective mission accomplishment of formal USAF Survival, Evasion, Resistance, and Escape (SERE) training, environmentally specific SERE training, and combat survival continuation training programs. The tactics, techniques, and procedures in this publication are recognized best practices presenting a solid foundation to assist USAF service members to maintain life and return with honor from isolating events.

This study investigates forms of theatre/performance practice and training that can be seen to employ 'trance' states or engage the concept of 'states of consciousness' as performative practice. Trance is considered to be the result of sustained involvement with detailed information that is structurally organised, invoking imaginative and affective engagements that are maintained as interactions between the performer, other performers, the environment and audience of the performance. This thesis investigates trance performance through the conceptual lens of dramatic arts practice. In their respective cultural contexts, trance and theatre attain qualities considered as sacredness. Trance practice and performance, across a range of cultural contexts, are analysed as social processes - as elements of power relations that influence the performer, audience and environment of the performance. As performance traditions and events, this study will examine strands of praxis that can be drawn from Constantin Stanislavski to Lee Strasberg to Mike Leigh; from Antonin Artaud to Samuel Beckett and Jerzy Grotowski; from the Balinese trance performance form of Sanghyang Dedari in the 1930s to the 1990s; from the Channeling practitioners in the U.S. in the 1930s to Seth and Lazaris in the 1970s to the 1990s; and from traditions of military training, performance violence, and rhetoric associated with the attacks of the 11th of September 2001 in the U.S. and its aftermath.

Some argued it would save the U.S. after 9/11. Instead, the CIA's enhanced interrogation program came to be defined as American torture. The Forever Prisoner, a primary source for the recent HBO Max film directed by Academy Award winner Alex Gibney, exposes the full story behind the most divisive CIA operation in living memory. Six months after 9/11, the CIA captured Abu Zubaydah and announced he was number three in Al Qaeda. Frantic to thwart a much-feared second wave of attacks, the U.S. rendered him to a secret black site in Thailand, where he collided with retired Air Force psychologist James Mitchell. Arguing that Abu Zubaydah had been trained to resist interrogation and was withholding vital clues, the CIA authorized Mitchell and others to use brutal "enhanced interrogation techniques" that would have violated U.S. and international laws had not government lawyers rewritten the rulebook. In The Forever Prisoner, Cathy Scott-Clark and Adrian Levy recount dramatic scenes inside multiple black sites around the world through the eyes of those who were there, trace the twisted legal justifications, and chart how enhanced interrogation, a key "weapon" in the global "War on Terror," metastasized over seven years, encompassing dozens of detainees in multiple locations, some of whom died. Ultimately that war has cost 8 trillion dollars, 900,000 lives, and displaced 38 million people—while the U.S. Senate judged enhanced interrogation was torture and had produced zero high-value intelligence. Yet numerous men, including Abu Zubaydah, remain imprisoned in Guantanamo, never charged with any crimes, in

contravention of America's ideals of justice and due process, because their trials would reveal the extreme brutality they experienced. Based on four years of intensive reporting, on interviews with key protagonists who speak candidly for the first time, and on thousands of previously classified documents, *The Forever Prisoner* is a powerful chronicle of a shocking experiment that remains in the headlines twenty years after its inception, even as US government officials continue to thwart efforts to expose war crimes. Silenced by a CIA pledge to keep him imprisoned and incommunicado forever, Abu Zubaydah speaks loudly through these pages, prompting the question as to whether he and others remain detained not because of what they did to us but because of what we did to them.

A compilation of current biographical information of general interest.

*Military Psychology for Africa* is the first textbook of its kind from Africa. Selected authors with competent military psychology knowledge, skills, expertise and experience each contributed a chapter to this unique book. The book empowers academics, students and military fellows to apply this knowledge at academic institutions and military units, during operations, and in presenting short courses. The book will also equip soldiers with new knowledge for advancing peace on the continent and abroad.
