~~Speakers-Listeners-And-Communication-Explorations-In~~

The standard account of the communicative situation, as I remarked in 1.6, envisages a single speaker addressing a single listener, where the role of the listener is seen as understanding what the speaker says, and the listener's full attention is given to what is being said (see Goffman 1981:129 for a characterisation of such a traditional view). We have seen, in the Map task data, that listeners may have intentions and goals in listening which are, to a greater or lesser degree ...

~~The listener and discourse comprehension (Chapter 7)~~

In successful communication, including public speaking, listeners and speakers are ____ interdependent. Listening is defined as ____ ... ____ listener disregards what the speaker has to say or prematurely decides that he or she won't like what the speaker has to say.

~~Auditory-Articulatory-Neural-Alignment-between-Listener~~

The listening process involves five stages: receiving, understanding, evaluating, remembering, and responding. Active listening is a particular communication technique that requires the listener to provide feedback on what he or she hears to the speaker. Three main degrees of active listening are repeating, paraphrasing, and reflecting. Key Terms

~~Understanding-Listening-|Boundless-Communications~~

The listener is the person or persons who have assembled to hear the oral message. Some texts might even call several listeners an "audience. " The listener generally forms an opinion as to the effectiveness of the speaker and the validity of the speaker's message based on what they see and hear during the presentation.

~~The Speech-Communication-Process-|Fundamentals-of-Public~~

However, effective communication is less about talking and more about listening. Listening well means not just understanding the words or the information being communicated, but also understanding the emotions the speaker is trying to convey.
