Considered by many to be mentally retarded, a brilliant, impatient fifth-grader with cerebral palsy discovers a technological device that will allow her to speak for the first time.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

This series of biographical profiles shines a spotlight on that special place "Where the West meets the Guitar." From Gene Autry and Roy Rogers to contemporary artists like Michael Murphy, Red Steagall, Don Edwards and Riders in the Sky, many entertainers have performed music of the West, a genre separate from mainstream country music and yet an important part of the country music heritage. Once called "Country and Western," it is now described as "Country or Western." Though much has been written about "Country," very little has been written about "Western"—until now. Featured are a number of photos of the top stars in Western music, past and present. Also included is an extensive bibliography of works related to the Western music field.

Bestselling and Newbery Medal-winning author Louis Sachar knows how to make readers laugh. And there are laughs galore in perennial favorite *Sideways Stories from Wayside School*, now available for the first time in ebook format! Accidentally built sideways and standing thirty stories high (the builder said he was very sorry for the mistake), Wayside School has some of the wackiest classes in town, especially on the thirtieth floor. That's where you'll meet Bebe, the fastest draw in art class; John, who only reads upside down; Myron, the best class president, ever; and Sammy, the new kid—he's a real rat. More than nine million readers have laughed at the wacky stories of Wayside School. So what are you waiting for? Come visit Wayside School!

What did you do before Google? The rise of Google as the dominant Internet search provider reflects a generationally-inflected notion that everything that matters is now on the Web, and should, in the moral sense of the verb, be accessible through search. In this theoretically nuanced study of search technology's broader implications for knowledge production and social relations, the authors shed light on a culture of search in which our increasing reliance on search engines influences not only the way we navigate, classify, and evaluate Web content, but also how we think about ourselves and the world around us, online and off. Ken Hillis, Michael Petit, and Kylie Jarrett seek to understand the ascendancy of search and its naturalization by historicizing and contextualizing Google's dominance of the search industry, and suggest that the contemporary culture of search is inextricably bound up with a metaphysical longing to manage, order, and categorize all knowledge. Calling upon this nexus between political economy and metaphysics, *Google and the Culture of Search* explores what is at stake for an increasingly networked culture in which search technology is a site of knowledge and power.

New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea.

More emphasis is being placed on writing instruction in K-12 schools than ever before. With the growing number of digital tools in the classroom, it is important that K-12 teachers learn how to use these tools to effectively teach writing in all content areas. The *Handbook of Research on Digital Tools for Writing Instruction in K-12 Settings* will provide research about how students use digital tools to write, both in and out of school settings, as well as discuss issues and concerns related to the use of these learning methods. This publication is beneficial to educators, professionals, and researchers working in the field of K-12 and teacher education.

Learn at home with help from *The Wonder Years*/Hallmark actress, math whiz, and New York Times bestselling author Danica McKellar using her acclaimed *McKellar Math* books! kittens, googly eyes, and more! Danica McKellar uses her proven math techniques to give children the solid grasp of addition and subtraction that will be key to their success and unlock their potential in the classroom and beyond! You will WANT to open this math book!

This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.
