Quiz & Worksheet - Female Reproductive Parts & Function ...

The female reproductive system is comprised of its major external and internal organs. The major external organs of the female reproductive system include the clitoris, labia majora, labia minora, and the Bartholin gland. The major internal organs of the female reproductive system include the vagina, uterus, and ovaries. Although gender is determined by which type of reproductive system a person has, rare cases occur in which a person may possess both the male and female reproductive system.
