The word Pranayama, therefore, means the restraint of vital energies. It is the control of vital energy which tingles through the nerves of persons. It moves his muscles and causes him to sense the external world and think his internal thought. This energy is of such a nature that it may be called the vis viva of the animal organism.

The Science of Pranayama - Divine Life Society

Prana and Pranayama Pranayama is an exact science. It is the fourth Anga or limb of Ashtanga Yoga. "Tasmin Sati Svasa prasvasayorgativicchedah Pranayamah"—Regulation of breath or the control of Prana is the stoppage of inhalation and exhalation, which follows after securing that steadiness of posture or seat, Asana. Thus is Pranayama defined in Patanjali Yoga Sutras, Chapter II-49.

The Science of Pranayama - Divine Life Society

Description From the Introduction: "Pranayama occupies a very important place in Indian religion. Every Brahmachari, and every Grihastha also, has to practise it three times every day morning, noon and evening in his daily worship during Sandhya. It precedes every religious practice of the Hindus.
