Joseph of Arimathea: A Study in Reception History examines the extensive and convoluted afterlives of a minor biblical character who nevertheless plays a major role in three pivotal scenes in the passion of Jesus Christ as presented by the four canonical Gospels: the request to Pilate for the body, the descent from the cross, and the burial of Jesus' corpse. Characterised in

subtly different ways by each Evangelist, these sparse biblical Josephs were expanded, expounded, translated, harmonised, and extended by early literary sources and developed thematically by the artistic traditions of the Renaissance. In the Medieval Period, Joseph arrived, by 'fortuitous' accident, in the British Isles, becoming an iconic figure for English nationalists (through the Glastonbury tradition) and for British Imperialists (through Parry's musical setting of Blake's Jerusalem). Twentieth-century developments in church life, film, literature, spiritualism, and studies of the historical Joseph round out what such a minor character can accomplish, given a sufficient richness in original texts and the right opportunities afforded by later cultural developments. In Joseph of Arimathea's case, certain aspects proved highly adaptable, especially the sharp contrast provided by his portrayal as a bold active figure in the Gospel of Mark and as a fearful passive character in the Gospel of John, the attractiveness of his wealth and nobility to those who considered themselves of similar (or much higher) status, and the opportunities provided by his swift appearance and departure from the most important event in Christianity's foundational documents.

Religion, Theory, Critique is an essential tool for learning about theory and method in the study of religion. Leading experts engage with contemporary and classical theories as well as non-Western cultural contexts. Unlike other collections, this anthology emphasizes the dynamic relationship between "religion" as an object of study and different methodological approaches and openly addresses the question of the manifold ways in which "religion," "secular," and

"culture" are imagined within different disciplinary horizons. This volume is the first textbook which seeks to engage discussion of classical approaches with contemporary cultural and critical theories.

Contributors write on the influence of the natural sciences in the study of religion; the role of European Christianity in modeling theories of religion; religious experience and the interface with cognitive science; the structure and function of religious language; the social-scientific study of religion; ritual in religion; the phenomenology of religion; critical theory and religion; embodiment and religion; the impact of colonialism and modernity; theorizing religion in terms of race and ethnicity; links among religion, nationalism, and globalization; the interplay of gender, sex, and religion; and religion and the environment. Each chapter introduces the topic, identifies key theorists and issues, and respects the pluralistic nature of the scholarship in the field. Altogether, this collection scrutinizes the explicit and implicit assumptions theorists make about religion as an object of analysis.
