Low voltage cables. Low Voltage power cables are constructed with rigid, solid or stranded, copper and aluminium conductors, and flexible (bare or tin-plated) copper conductors. XLPE, PVC, LSF/LSOH and elastomer compounds are the main insulating and shielding compounds for these cable types. Steel (or aluminium for single core cables) wires or tapes may be applied under the outer sheath, providing additional mechanical protection.

About LVC - Low Voltage Cables Ethernet Cable Supply Plain copper conductors to BS EN 60228:2005, PVC insulated. Single core suitable for use at temperatures from -40°C to 105°C with excursions up to 120°C. Twins and multicores PVC sheathed at 70°C. Suitable for 12v or 24v systems (Maximum voltage 60v) Reduced insulation gives considerable savings in weight and volume especially when used in large wiring harnesses.
